JOOLA

JOOLA TABLE TENNIS CATALOG 2020-2021

2020

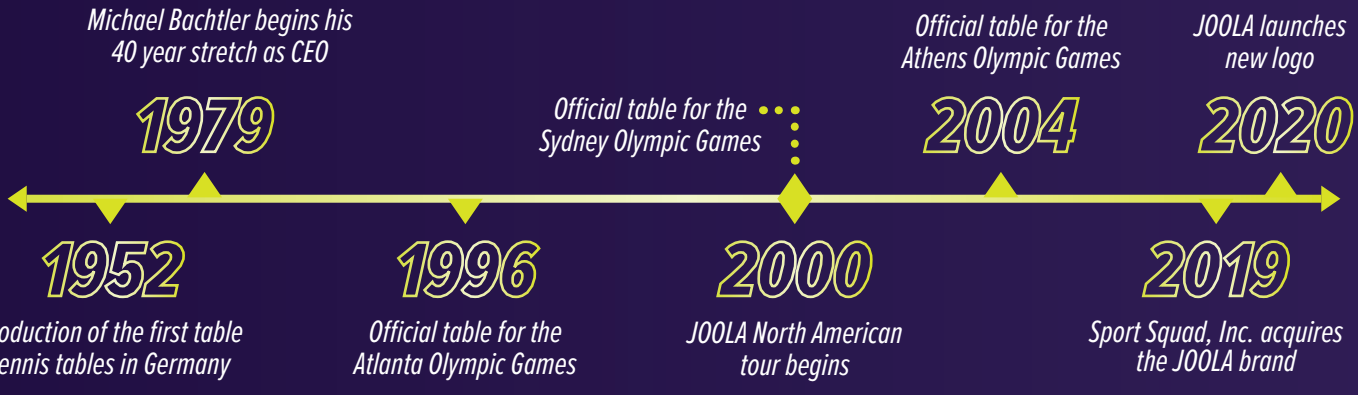

HISTORY

JOOLA was founded by Karl Frey, the former owner of the department store group, Fr. Th. Jooss, located in Landau, Germany. The sports department of Jooss was involved in the production of the first table tennis tables in 1952. By 1954, table tennis production became an independent department within the group. In the 1950's, it was common to combine the names of companies and cities, which is how the JOOLA brand name came to be – a combination of Jooss and Landau.

After tremendous success and popularity, JOOLA established itself as an independent company and relocated to Godramstein in 1963. The company experienced exponential growth and quickly reached production capacity in its new location, despite taking over additional buildings. In 1973, JOOLA opened its Siebeldingen campus, which features an 1800m2 production facility, 1200m2 of warehousing space, and 700m2 of office space. The Siebeldingen campus is still being used today as the home of JOOLA's European Headquarter.

In 1979, Michael Bachtler, managing director of JOOLA since 1968, took over the company as CEO. He oversaw major milestones such as becoming the official table sponsor for the 1996 Atlanta, 2000 Sydney and 2004 Athens Summer Games. In 2018, Michael Bachtler announced his plans for succession and that the JOOLA brand will be acquired by its long-time distributing partner in the USA – Sport Squad, Inc.

In 2019 JOOLA was acquired by their North American partner, Sport Squad, Inc. under the leadership of Richard Lee, President of the company. JOOLA and Sport Squad, Inc. have been partners since 2006, when Sport Squad, Inc. became the North American distributor for the JOOLA brand.

NEW ERA

The JOOLA Trinity logo was introduced in 2020 to reflect JOOLA's continued commitment to excellence. The stylized J symbolizes a new era of renewed energy as JOOLA strives to take table tennis into the future.

INNOVATION

JOOLA is committed to working tirelessly to make the best products, pioneer technological innovations, push limits, and provide players the opportunity to pave your own pathway.

INSPIRATION

Anyone can pick up a paddle and play. Recreational or elite, table tennis is an all-encompassing sport that brings together people from all walks of life and JOOLA is here to support you through your entire table tennis journey.

INCLUSION

JOOLA strives to inspire players to recognize their inner champion.

LEGACY LOGO

JOOLA®

NEW LOGO

JOOLA®

As we move forward, we want to celebrate the work of all those who have helped build the JOOLA legacy into what it is today by preserving the classic logo as the JOOLA Legacy logo. This logo, which has represented JOOLA since 1952, symbolizes our brand's heritage and will continue to be used on select JOOLA legacy products, including some rubbers, textiles, and other products.

TEAM JOOLA

Over the last 60+ years, JOOLA has achieved so many tremendous milestones. The ingenuity of its team and its commitment to excellence propelled the brand from the department store floor to the Olympic stage. As a company that dares to grow, JOOLA will continue to build on its legacy of being an industry leader. I am thrilled to be a part of Team JOOLA and am so excited to usher in this new era as JOOLA takes the sport of table tennis into the future.

RUBBERS

JOOLA RUBBERS

From top-of-the-line rubbers utilized by Team JOOLA's professional athletes to forgiving, budget-friendly rubbers used by entry-level players, the JOOLA rubber collection offers something suitable for players at every level. We've categorized our rubbers to help you easily find the right JOOLA rubber for your game.

PREMIUM

JOOLA Premium Line rubbers are the best of the best and utilize the latest state-of-the-art technologies. These rubbers are used by professionals in the pinnacle of the sport.

PROFESSIONAL

JOOLA Professional Line rubbers incorporate innovative technologies to meet the needs of the modern table tennis player looking for that something extra to compete at the professional level.

PERFORMANCE

JOOLA Performance Line rubbers are tried and true favorites. These high-quality rubbers posses proven characteristics that are favored amongst all competitive players.

PROGRESSIVE

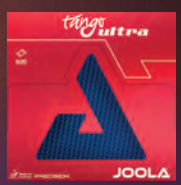

JOOLA Progressive Line rubbers are well-suited for entry-level players who want to get serious about learning the game. These forgiving rubbers offer high controllability to make perfecting your technique easy.

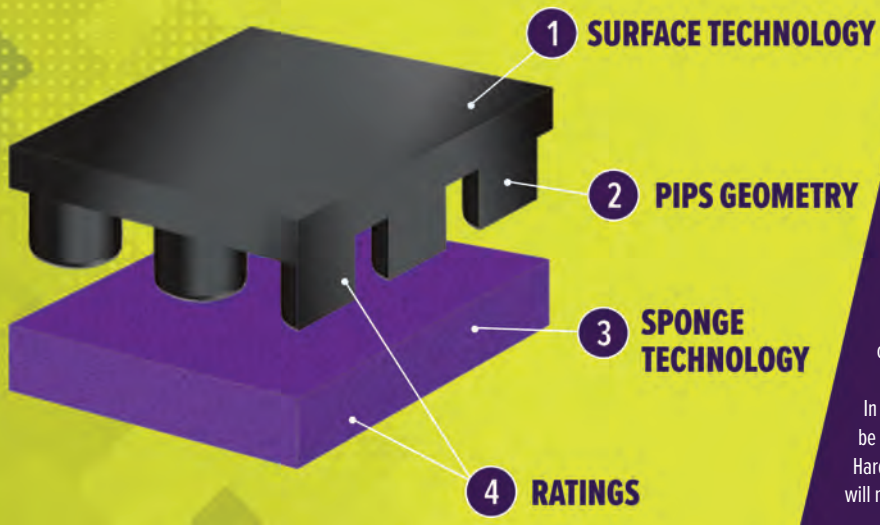

PRECISION

JOOLA Precision Line rubbers feature specialized, pips-out rubbers to meet the playing needs of the modern defensive player.

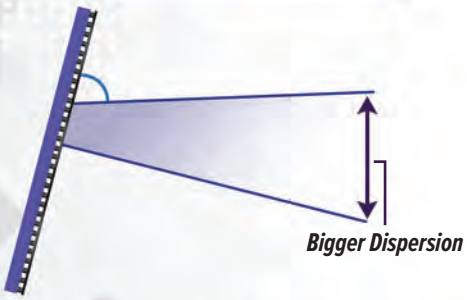

WHAT IS YOUR JOOLA RUBBER?

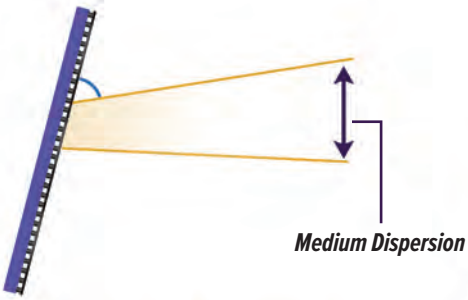

As our rubber technology has advanced to include a wider range of sponge treatments, pimple geometries, topsheet specifications, and more, JOOLA's product development team no longer feels that the previous method of denoting rubber hardness solely by sponge density provides an accurate representation of our rubbers.

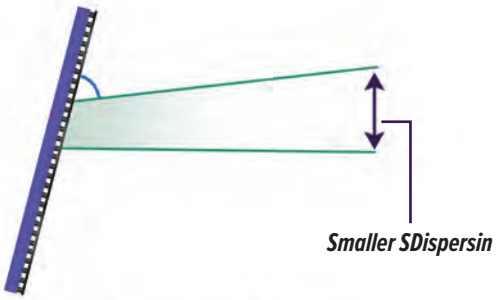

In an effort to comprehensively summarize the overall feel of the rubbers, JOOLA will be moving to a qualitative scale of Soft, Medium-Soft, Medium, Medium-Hard, and Hard. This new rating system takes all variables into consideration and we believe it will make it easier for players to find the right JOOLA rubbers for their game.

1 SURFACE TECHNOLOGY

Dispersion Exit angle

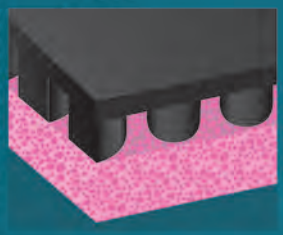

ENHANCED TRACTION
Traditional, proven surface structure for lots of control.

ULTRA TRACTION
Innovative technology that makes the surface structure of the rubber sticky. Achieve the most extreme rotation values with the improved adhesion. Slipping of the ball is impossible.

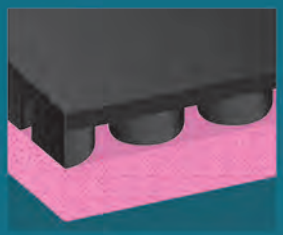

ADVANCED TRACTION
An even more friction-intensive surface structure for a significantly increased grip of the ball. More spin and precision for your game.

2 PIPS GEOMETRY

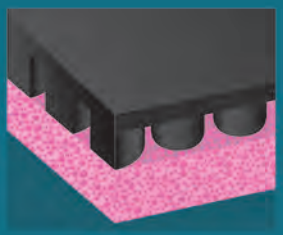

SOFT GEOMETRY
(Small Pips, Big Spacing)

This type of pimple geometry was specifically designed to provide lots of control. Utilizing thinner pimples with larger gaps in between each pimple, this structure creates more of a cushion. In return, the trajectory of the ball is higher and the ball feedback is more intense.

SOFT GEOMETRY
(Small Pips, Big Spacing)

This type of pimple geometry was created to increase spin and speed potential. Featuring wider pimples with smaller gaps, the tighter pip structure creates a harder topsheet for a flatter ball trajectory and more direct force.

SOFT GEOMETRY
(Small Pips, Big Spacing)

This type of pimple design is a great example of how the pimples and sponge work together. It uses smaller pimples in conjunction with a thicker sponge (max+) to create a massive ball rebound effect that results in increased dynamics for your game. Experience spin and speed on a new level!

3 SPONGE TECHNOLOGIE

Thin pores

BALANCE SPONGE (B)

The JOOLA Balance is a fine-pored sponge that offers great control value and produces shots with a flatter arch and shorter trajectory.

Medium pores

MOMENTUM SPONGE (M)

The JOOLA Momentum is a medium-pored sponge that utilizes elastic potential energy to offer direct power and high-piercing force for longer trajectory shots.

Medium + pores

HYPER BOUNCE SPONGE (HB)

The JOOLA Tensity is a large-pored sponge that utilizes its air pockets like a spring to harness and reflect elastic potential energy back into the ball to create a high catapult effect.

Large pores

TENSITY SPONGE (T)

The ground-breaking HyperBounce Sponge has been engineered to maximize the speed glue effect and to minimize any kinetic energy loss. The result is an incredibly dynamic sponge that injects power into each stroke for long trajectory shots.

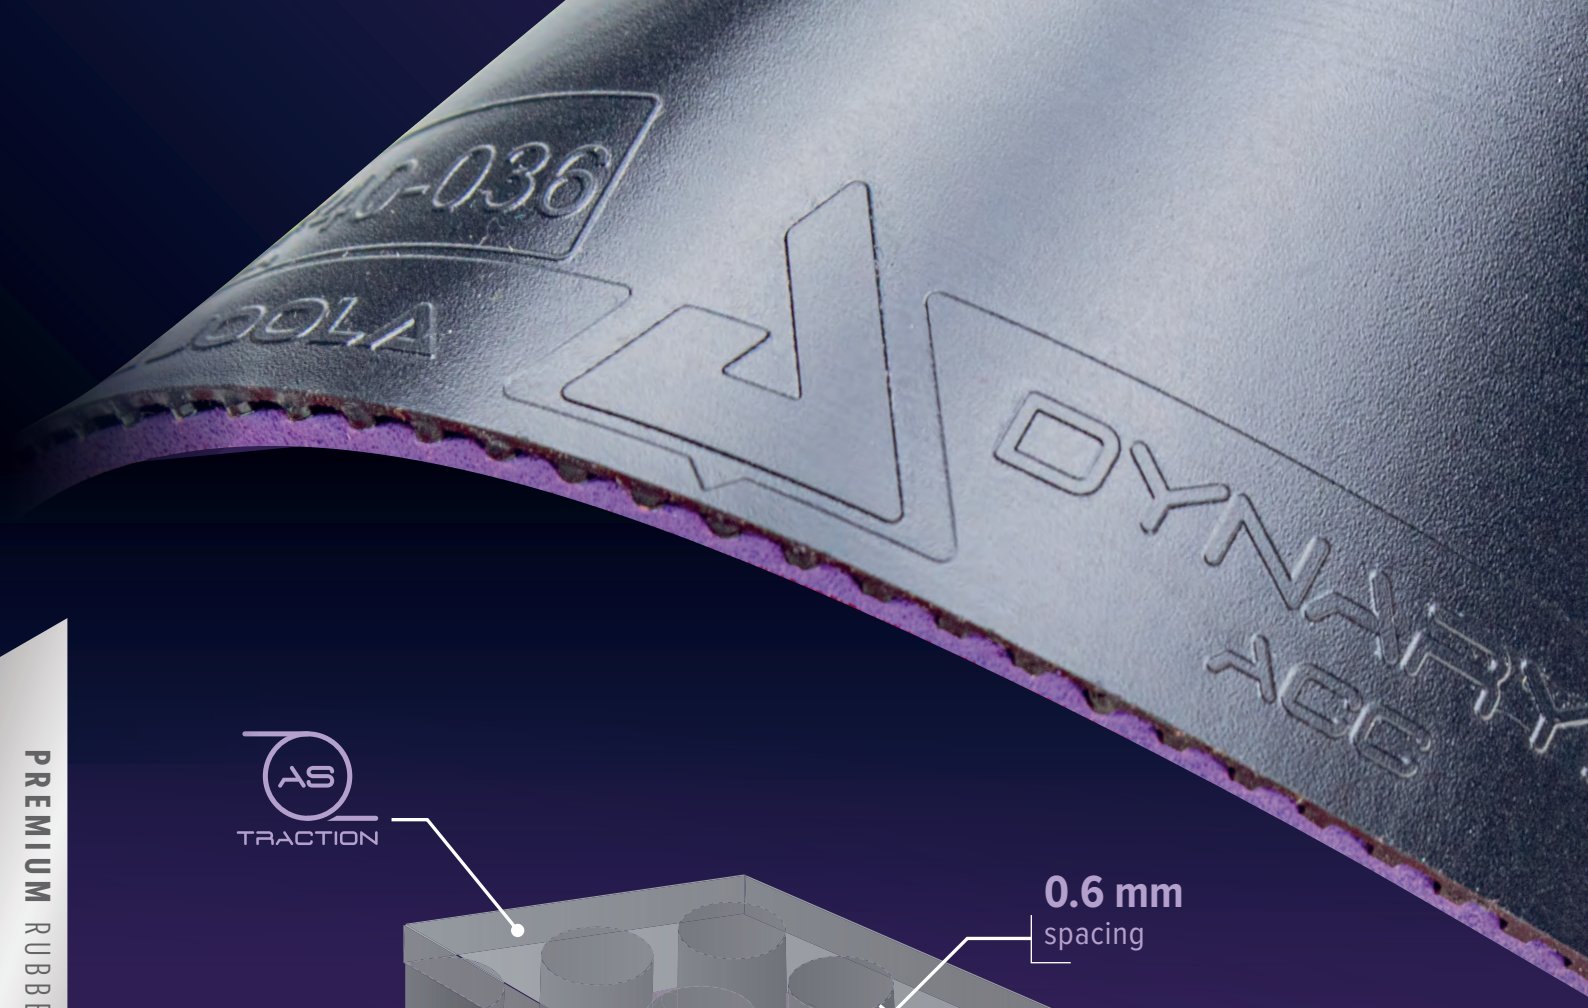

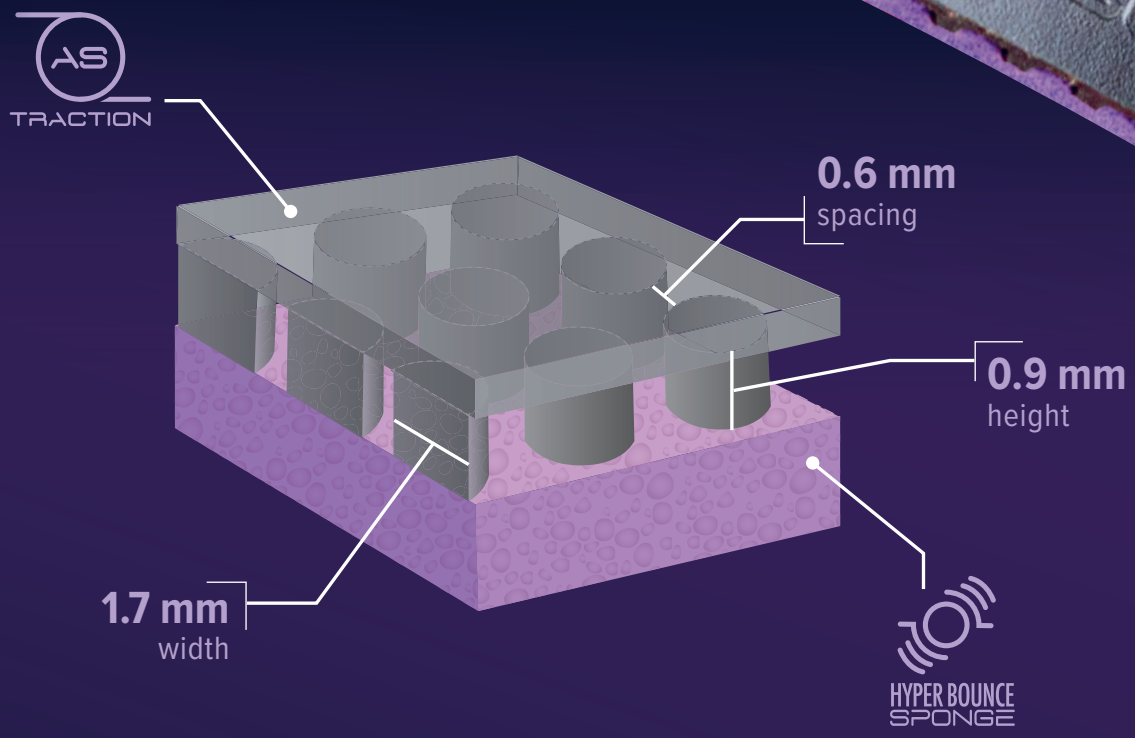

4 RUBBER RATINGS

JOOLA has made the decision to cease using the old numerical system of rubber rating. We believe that our new classification system is easier to understand and that an exact classification into very precise ratings is impossible and highly subjective.

We will keep the traditional categories of playing features, but classification now has only 4 levels.

*Please reference page **26** for a complete over view of our JOOLA rubber ratings.

NEW

DYNARYZ

DYNARYZ incorporates the next generation HyperBounce sponge that is engineered to the maximum speed glue effect. Coupled with the Advanced Surface (AS) Traction technology, the increased dwell-time gives the ability to command every shot.

With DYNARYZ, you'll be ready to **DETHRONE THE COMPETITION!**

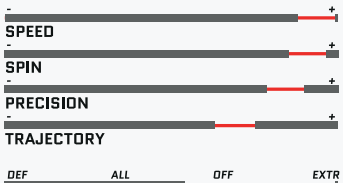

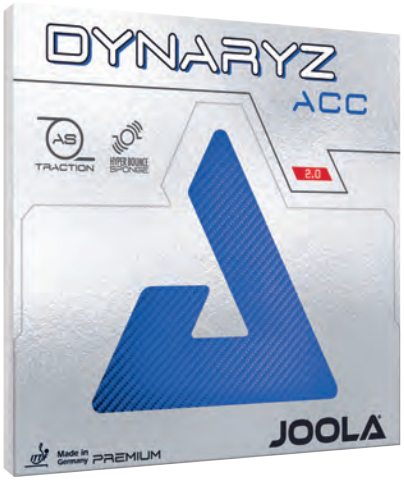

TRACTION HYPER BOUNCE SPONGE

DYNARYZ AGR

The JOOLA DYNARYZ AGR Table Tennis Rubber is used by the professionals in the pinnacle of the sport. If your game is ready for the highest caliber of play, then the JOOLA DYNARYZ AGR is for you. The new signature purple Hyperbounce sponge is the key to the amazing dynamics of this hard rubber. Combined with the Advanced Traction Surface, the precision and quality of each and every shot will be unprecedented. Harness the power of the JOOLA DYNARYZ AGR Table Tennis Rubber for an unrivaled game!

2,0/ max+

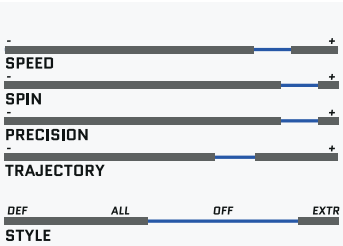

TRACTION HYPER BOUNCE SPONGE

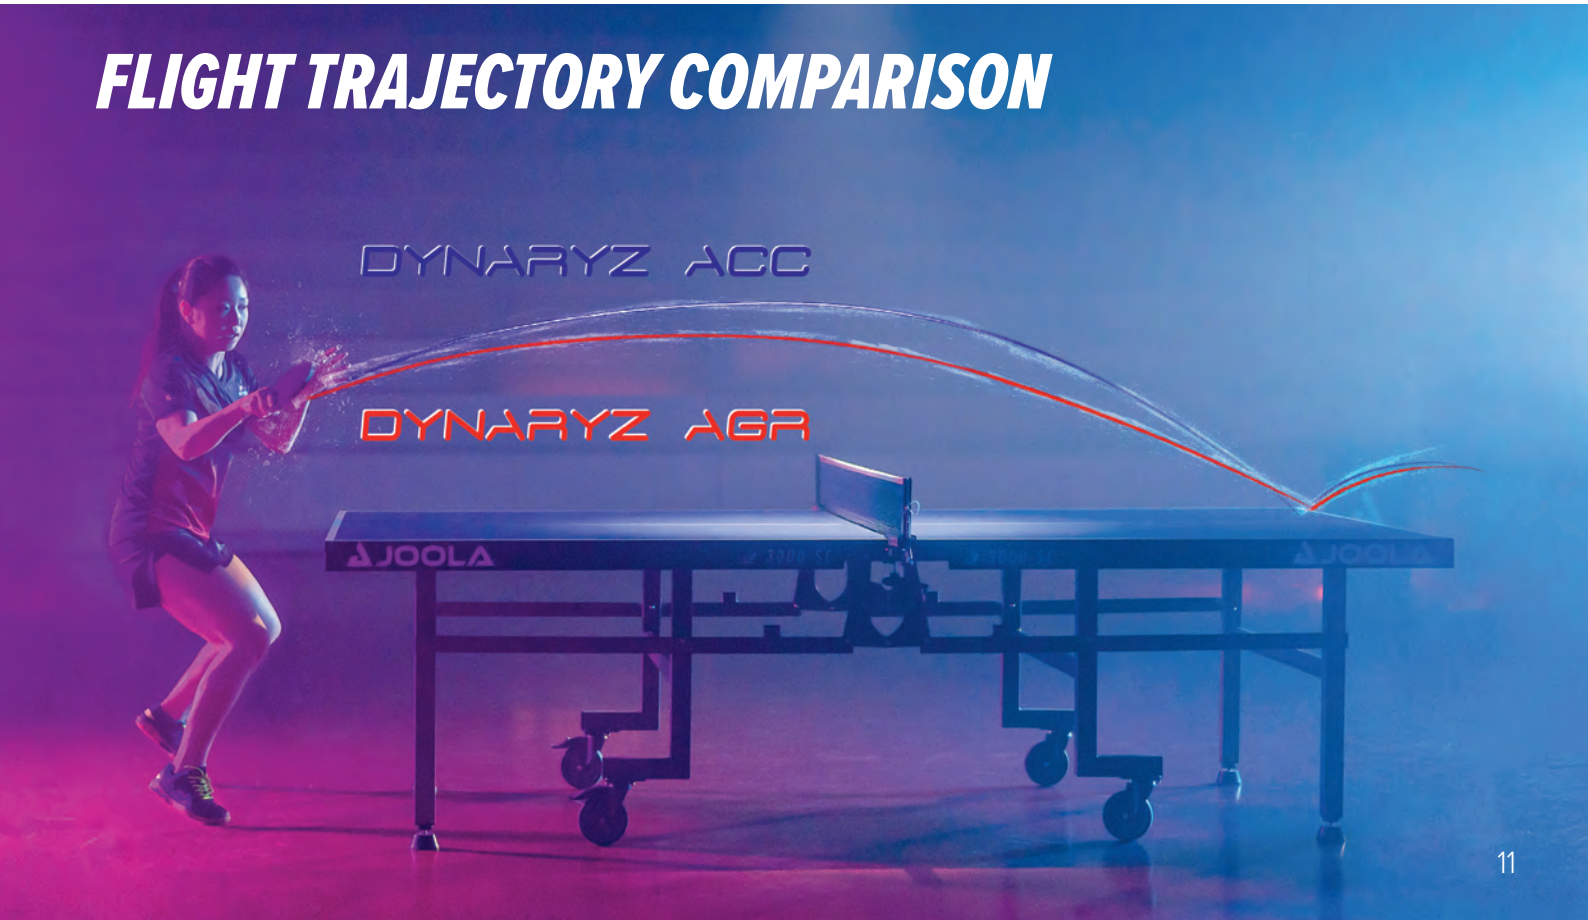

DYNARYZ ACC

Equip yourself with a rubber that brings more spin and speed into your game without losing control! What seems like a dream is now a reality with the JOOLA DYNARYZ ACC. Featuring the signature purple medium-hard HyperBounce sponge paired with Advance Traction Surface Technology. the JOOLA DYNARYZ ACC is spin-friendly, dynamic, and precise. Be prepared to hit your game-winning shots with laser-like precision! The JOOLA DYNARYZ ACC is the rubber of choice of those that are aspiring to play at the professional level.

2.0/max+

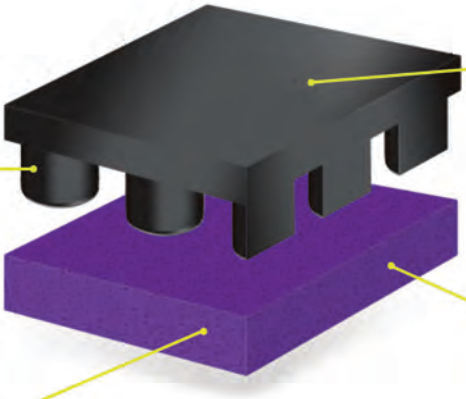

FLIGHT TRAJECTORY COMPARISON

THE QUALITY OF YOUR SHOTS

DYNAMIC

The Advanced Traction Surface allows for direct energy transfer

DYNAMIC PIPS GEOMETRY

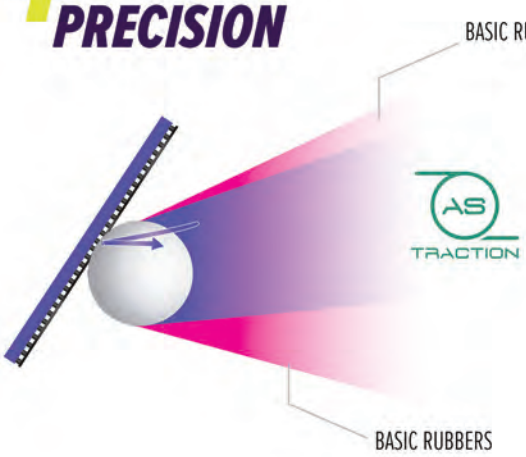

This design combines smaller pips with a thicker sponge to create a massive ball rebound effect

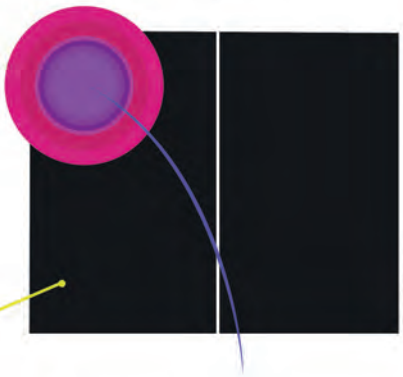

The Hyperbounce Sponge retains massive amounts of potential energy, which is released upon ball contact for explosive power

OPTIMIZED PORE SIZE

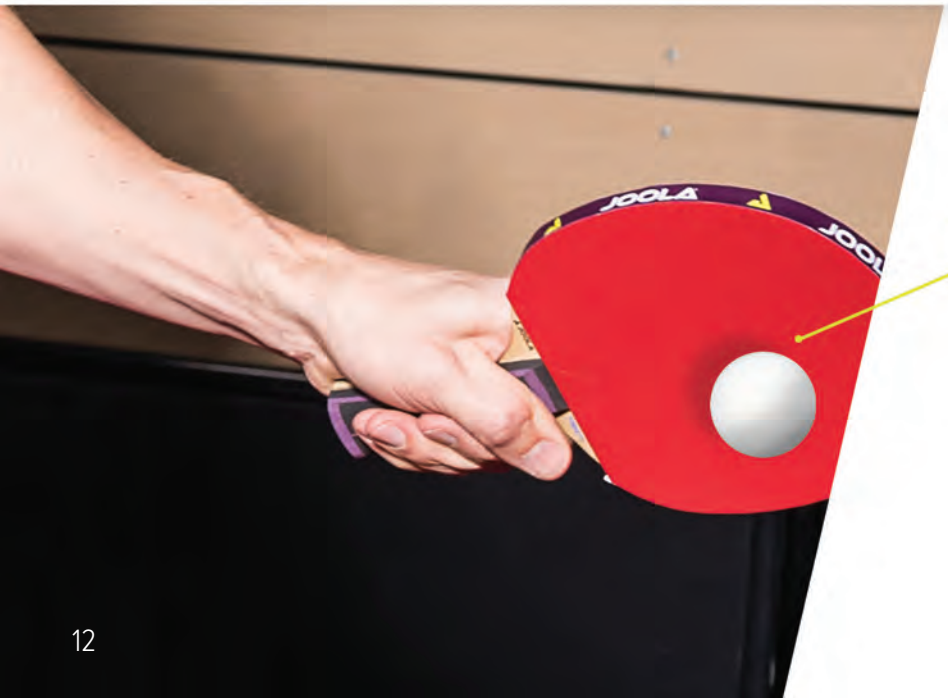

The medium-large pores of the Hyperbounce sponge allow energy to be transferred efficiently to create increased spin and speed

PRECISION

The high-friction Advanced Traction Surface prevents the ball from slipping and creates clean, direct ball contact. With the resulting increase in control, you're able to easily and reliably manipulate the angle of your shots to suit your exact strategy.

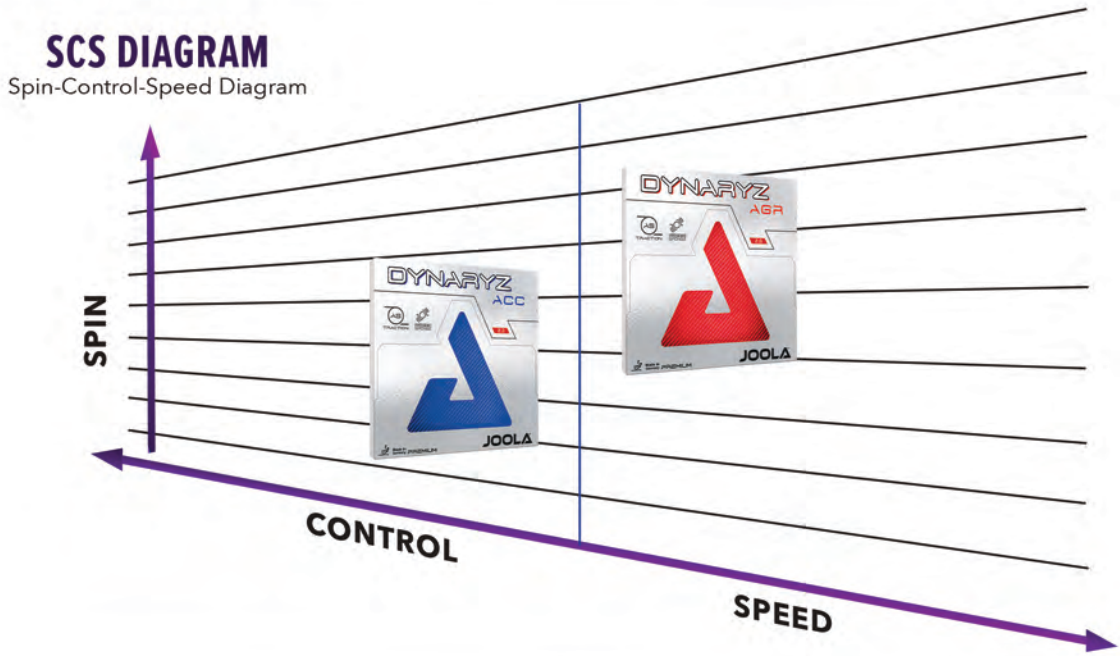

TOUCH

Up until now, it was thought that spin and speed could only be achieved from hard ball contact, and as a result - less ball feedback.

The JOOLA DYNARYZ rubbers break away from these limitations to bring you a completely new playing experience. The Hyperbounce sponge is incredibly innovative in that its medium-large pores
extend the ball contact time to give you increased feedback and a softer touch, but still deliver the explosive power necessary for this professional-level of play.

HOW DYNARYZ REACTS TO YOUR SHOTS?

SPIN vs. BACKSPIN:

The Advanced Traction Surface significantly improves ball contact to create a higher ball trajectory that allows you to control and deliver your spin shots with ease.

SPIN vs. TOPSPIN:

The Advanced Traction Surface prevents the ball from slipping and allows you to deliver precise counterspin shots with a lower ball trajectory.

FROM HALF-DISTANCE:

The dynamic Hyperbounce Sponge releases explosive power to deliver your shots with full force even at greater distances from the table.

SHORT GAME:

The grippy Advanced Traction Surface dramatically increases control and precision, so that you can carry out the shots you've strategized for your short game in exactly the way you envisioned it.

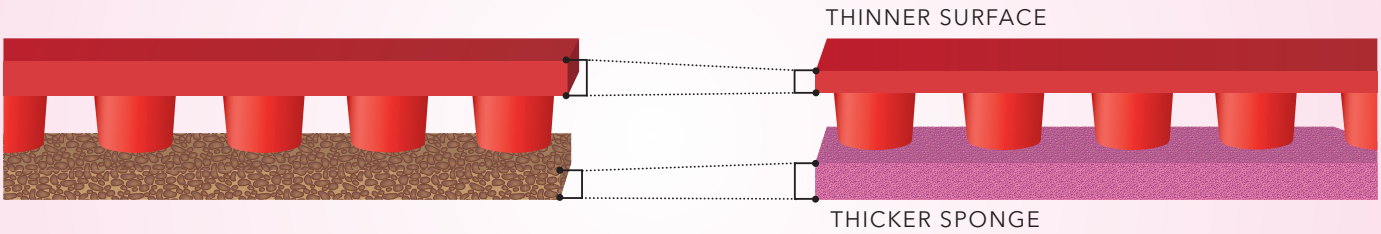

BLOCKING SPIN:

The increased ball feedback helps you develop an accurate feel for the ball to make effective passive shots.

POWER SHOTS:

When you need a boost for a full-power shot - this is where the JOOLA DYNARYZ really shines. Between the Advanced Traction Surface, Hyperbounce Sponge, and overall design, these rubbers were specifically designed to unload massive amounts of energy at high speeds.

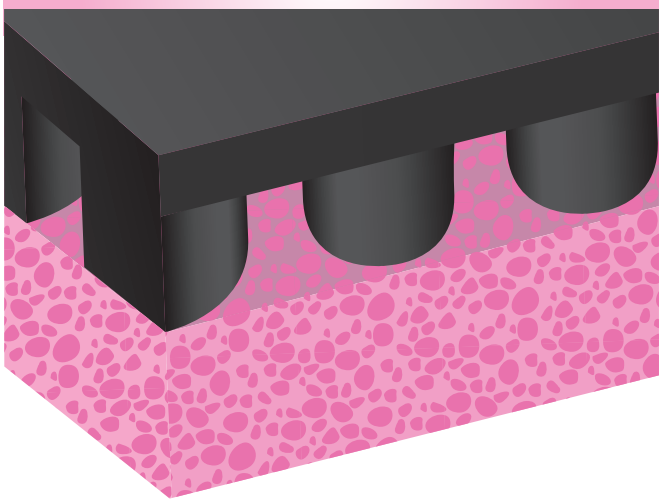

RHYZER SERIES

STANDARD RUBBER

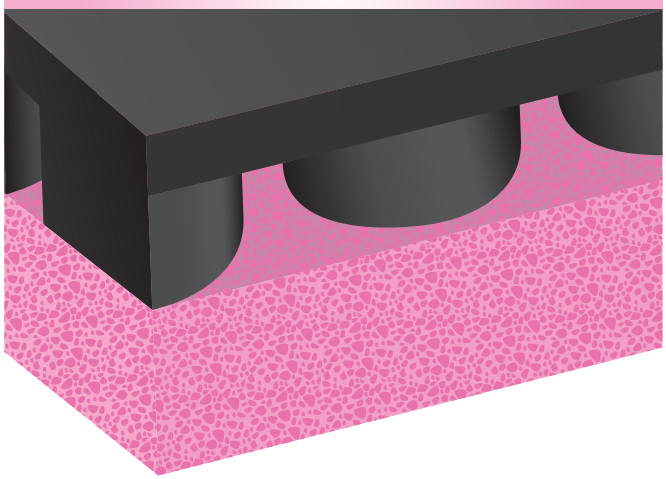

RHYZER SERIES

RHYZER
43° & 48°

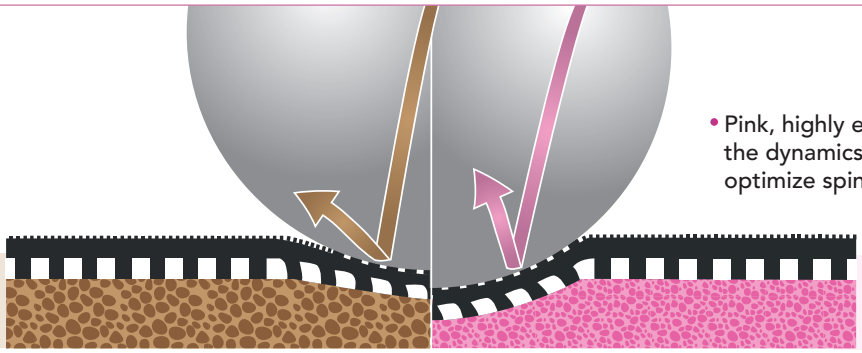

- Narrows pimples, larger gaps between pimples
- Extremely thin and gripy surface under high tension
- Use of large pored 48°/43° sponge (pink)
- In the Powermax version with a thicker sponge underlay

RHYZER PRO
45° & 50°

- Wider pimples, shorter gaps betweeen pimples
- Extremely thin and gripy surface under high tension
- Use of med-sized pored 50°/45° sponge (pink)
- In the Powermax version with a thicker sponge underlay

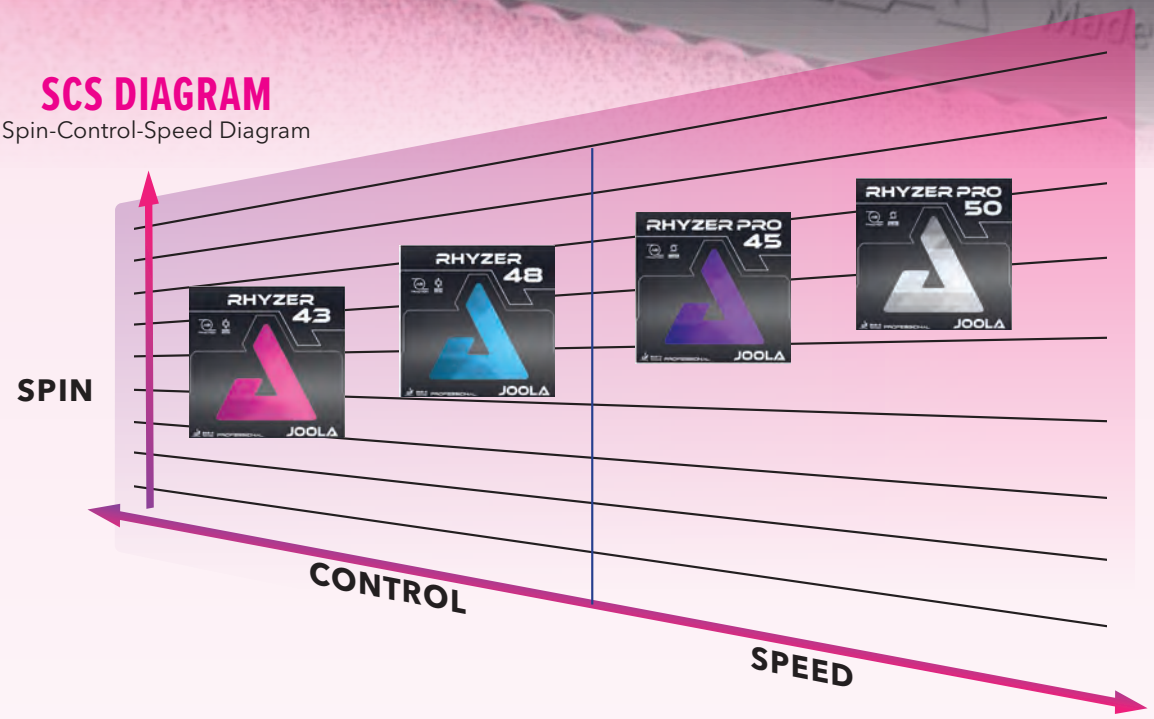

- Pink, highly elastic sponge to increase the dynamics (achieve higher catapult to optimize spin performance.

FLIGHT TRAJECTORY COMPARISON

TRACTION MOMENTUM SPONGE

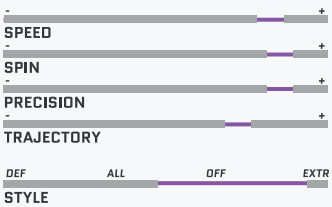

RHYZER PRO 50

Play like an elite athlete with the JOOLA RHYZER PRO 50! The stiff Momentum sponge features Tensor technology, making the ball contact time shorter, the stroke harder, and the trajectory lower. This is coupled with a grippy topsheet that uses a unique pimple geometry and Advanced Surface Traction technology to deliver spin with high-piercing force. Ignite your game with the JOOLA RHYZER PRO 50!

2.0/max+

TRACTION MOMENTUM SPONGE

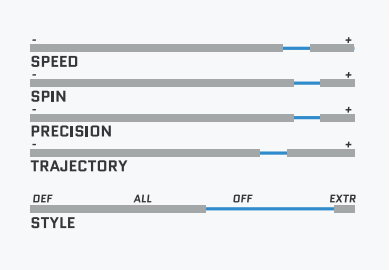

RHYZER PRO 45

Arm your offensive game with the JOOLA RHYZER PRO 45! The medium-hard Momentum sponge is infused with Tensor Technology to optimize speed and spin performance. The thinner topsheet utilizes Advanced Traction Surface Technology for added grip, while the unique RHYZER PRO pimple geometry adds more power for ideal rotation. The high spin and speed potential of the JOOLA RHYZER PRO 45 will take your game to the next level!

2.0/max+

TRACTION TENSITY SPONGE

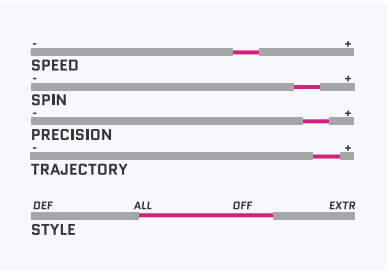

RHYZER 48

Advance your skills with the JOOLA RHYZER 48 rubber! Featuring a thin topsheet with a pimple geometry unique to RHYZER rubbers, the ball catapults off the medium-hard Tensity sponge, which features Tensor technology and unique pimple geometry. Combined with the rubber's grippy Advanced Traction Surface, your spin game is sure to keep your opponent on their toes. If you are a modern offensive player, the JOOLA RHYZER 48 is the key to unlocking your success!

2.0/max+

TRACTION TENSITY SPONGE

RHYZER 43

The JOOLA RHYZER 43 is a gamechanger! The thin topsheet has a pimple geometry unique to RHYZER rubbers and utilizes Advanced Traction Surface technology to deliver impressive spin. With a medium-soft Tensity sponge, the JOOLA RHYZER 43 offers control and precision while its Tensor technology & unique pimple geometry gives you the highest ball trajectory of all the RHYZER rubbers. Play with precision using the well-balanced JOOLA RHYZER 43 rubber!

2.0/max+

Goldentango

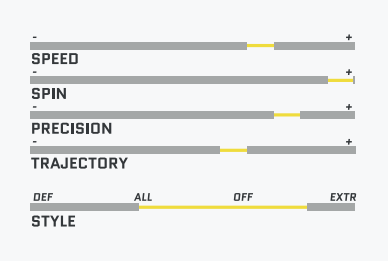

US TRACTION MOMENTUM SPONGE

GOLDEN TANGO

Harness the power of the JOOLA GOLDEN TANGO with its German sponge & Chinese topsheet! Featuring a stiff Balance sponge with Tensor technology, the JOOLA GOLDEN TANGO is extremely fast and elastic. Ultra-Traction Surface technology is used to create an extremely tacky topsheet reminiscent of Chinese rubbers. The two combined produce incredible rotation and an arched trajectory. Take out your opponent from the table or from half-distance with the JOOLA GOLDEN TANGO!

2.0/max

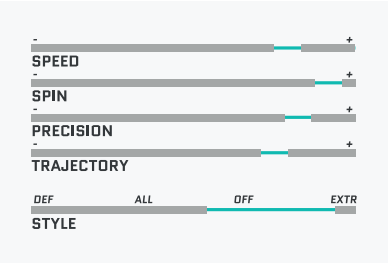

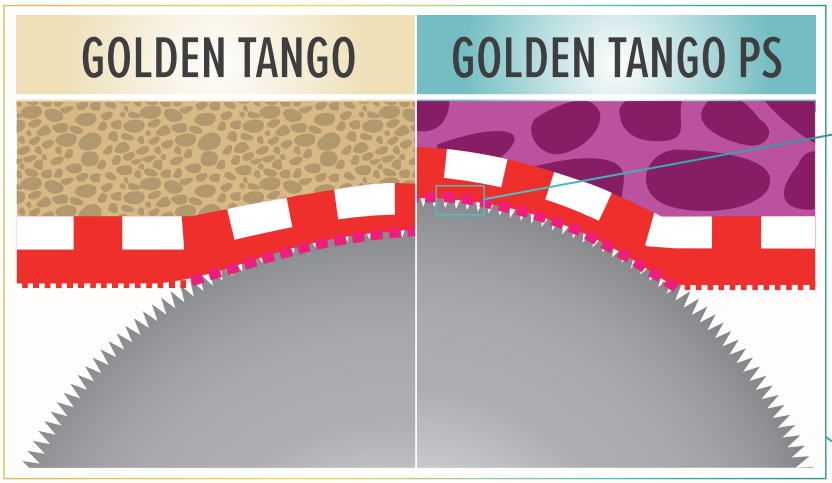

US TRACTION MOMENTUM SPONGE

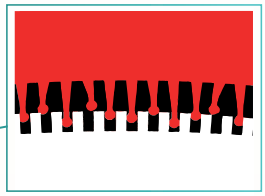

GOLDEN TANGO PS

Create unparalleled spin with the JOOLA GOLDEN TANGO PS! Utilizing Ultra-Traction Surface technology, the sticky topsheet enables extreme spin for all strokes. With Tensor technology mimicking the tension of a stretched rubberband, the highly elastic Momentum sponge has excellent feedback and creates a high catapulting effect. Prepare to play with the innovative and grippy JOOLA GOLDEN TANGO PS!

2.0/max

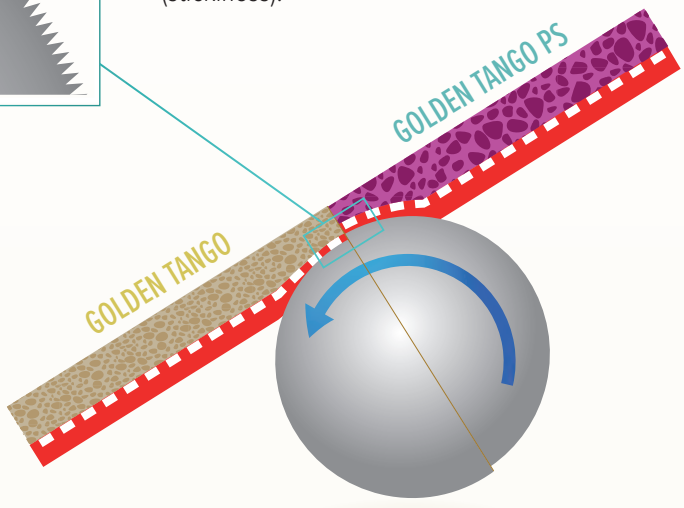

Vertically positioned polymer strands at the surface of the GOLDEN TANGO (nanoscale) interlock with the surface structure of the ball and provide enlarged adhesive forces (stickiness).

When the ball hits the rubber surface this is also called “coupling” in modern table tennis. Coupling is favoured by the sticky surface of the GOLDEN TANGO (Sticky Rubber Technology).

Especially at the most extreme topspin strokes slipping of the ball is prevented and the reliable grip of the ball is improved. The result is increased spin effect for all strokes.

JOOLA

rhyzm SERIES

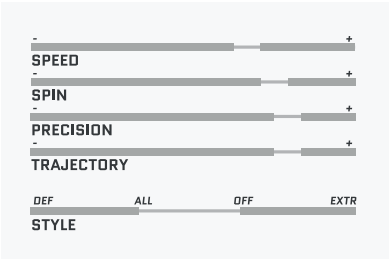

AS TRACTION · TENSITY SPONGE

RHYZM TECH

Pump up your game with the JOOLA RHYZM-Tech rubber! Using Tensor technology designed to create more tension on the topsheet, the larger-pored JOOLA RHYZM-Tech has more elasticity and feeling, and produces a solid catapult effect. These effects are balanced by the softer Tensity sponge, giving you more control of your game. Unlock your potential with the JOOLA RHYZM-Tech!

2.0/max

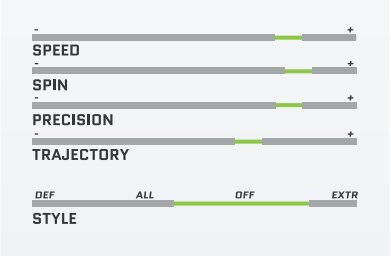

AS TRACTION · MOMENTUM SPONGE

RHYZM P

Bring on the spin and speed! Featuring a medium-hard Momentum sponge with Advanced Traction Surface technology, the JOOLA RHYZM-P rubber is spin-friendly, dynamic, and precise. Be prepared to deliver your game-winning shots with high-piercing force!

2.0/max

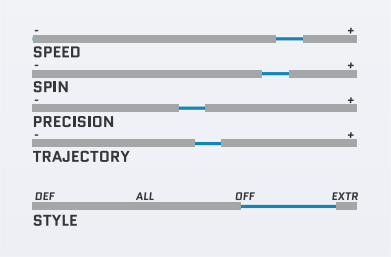

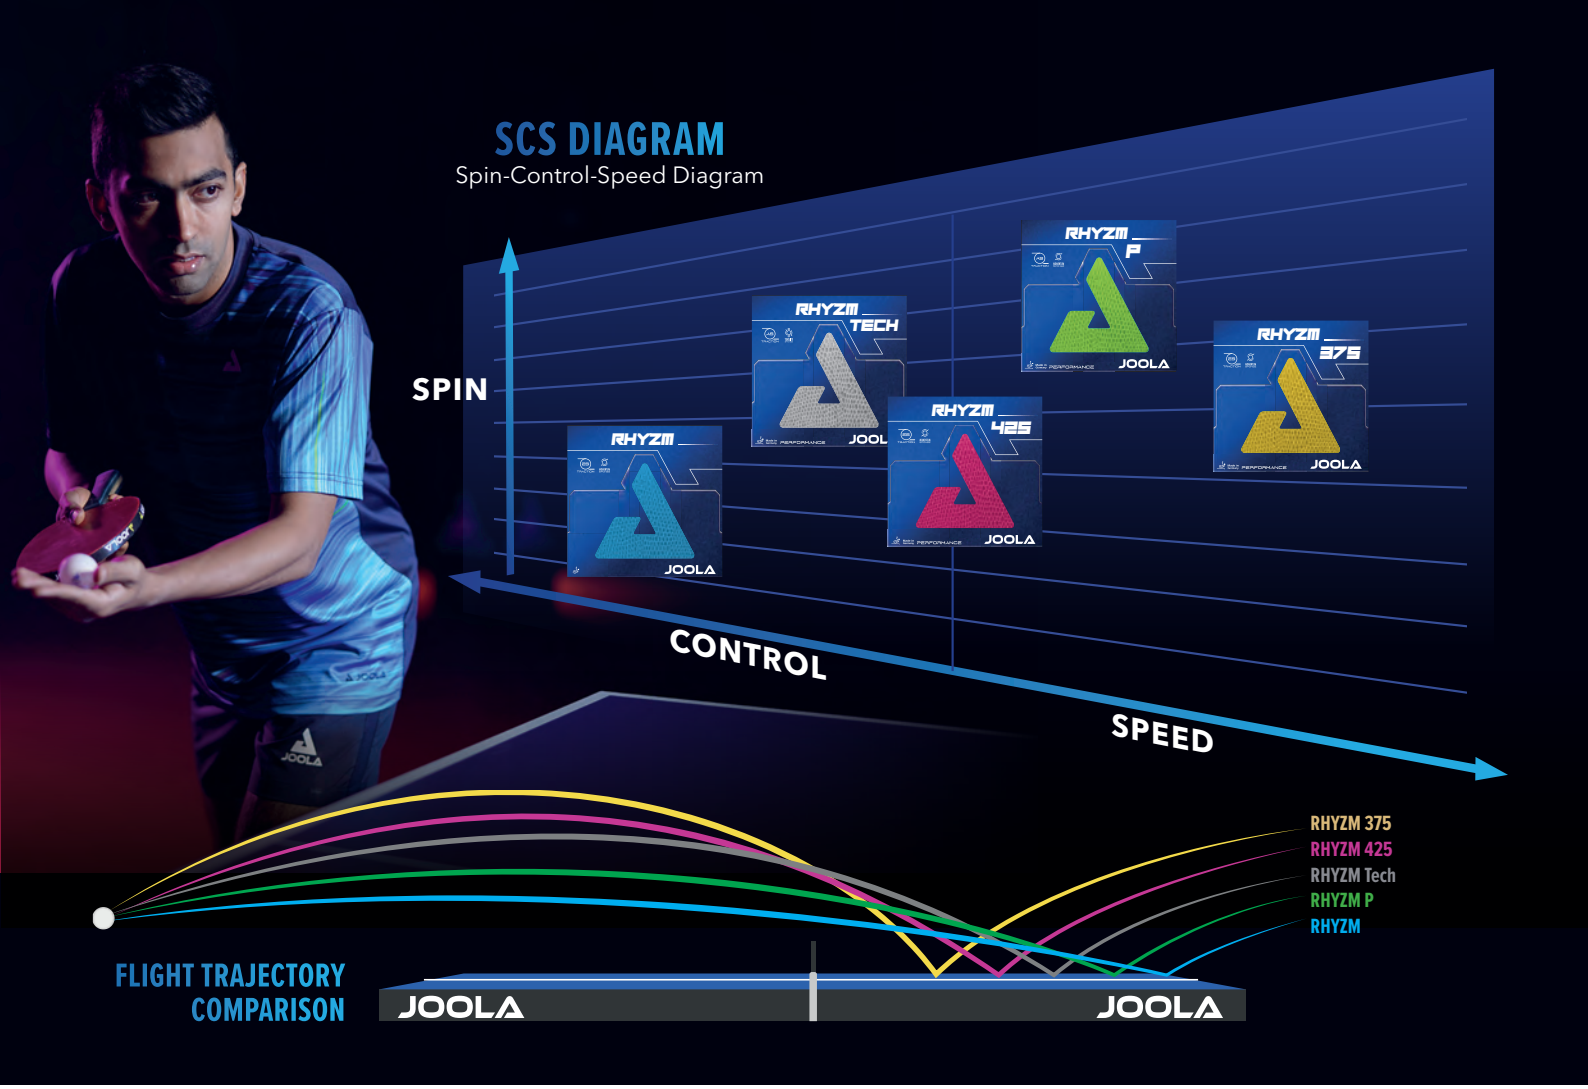

ES TRACTION · MOMENTUM SPONGE

RHYZM

If you're ready to take your game to the next level, the JOOLA RHYZM rubber is here to give you the boost you need. The fastest of all the Rhzym rubbers, a grippy topsheet with Enhanced Traction Surface technology overlays a hard, powerful Momentum sponge giving you superior dynamics, spin, and force. The JOOLA RHYZM brings a new dimension of play!

2.0/max

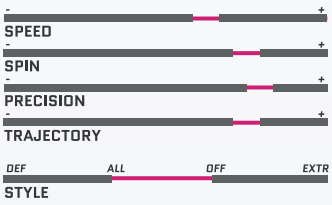

TRACTION MOMENTUM SPONGE

RHYZM 425

Refine your game with the JOOLA RHYZM 425 rubber! This rubber offers all the dynamics and Enhanced Traction Surface technology of the original RHYZM, but with a medium-soft Momentum sponge to give you added control. Unlock your full potential with the JOOLA RHYZM 425!

2.0/max

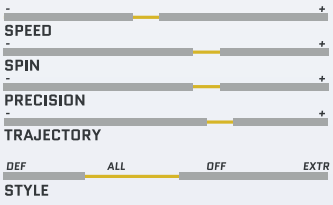

TRACTION

RHYZM 375

Finesse your technique with the JOOLA RHYZM 375 rubber! The soft Momentum sponge has the highest control value of all the RHYZM rubbers. The JOOLA RHYZM 375 is perfect for players who prefer a high ball trajecotry when applying topspin using the rubber's Enhanced Traction Surface technology. Block and counter like an absolute pro with the JOOLA RHYZM 375!

2.0/max

AS TRACTION · TENSITY SPONGE

MAXXX P

Take your spin game to the next level with the JOOLA MAXXX-P! The medium-soft Tensity sponge with Tensor technology provides great elasticity, feeling, and control. The JOOLA MAXXX-P improves ball coupling with Advanced Traction Surface technology and unique pimple geometry for perfect topspin shots at high speed. Weaponize your game with the JOOLA MAXXX-P!

2.0/max

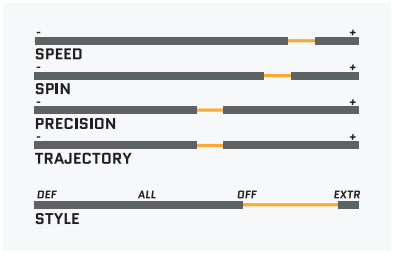

ES TRACTION · TENSITY SPONGE

MAXXX 500

Equip yourself with the fastest and most dynamic rubber of the JOOLA MAXXX series! Featuring a hard Tensity sponge paired with Tensor technology, the JOOLA MAXXX 500 fires with torpedo-like speed. Meanwhile, the Enhanced Traction Surface and unique pimple geometry provide great grip and feeling for a dynamic game. Add a serious boost to your game with the JOOLA MAXXX 500!

2.0/max

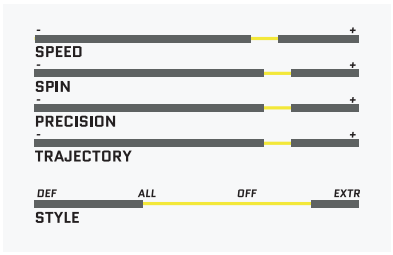

ES TRACTION · TENSITY SPONGE

MAXXX 450

Keep your opponents on their toes with the JOOLA MAXXX 450 rubber! The JOOLA MAXXX 450 emphasizes ball feeling with its medium Tensity sponge, but still fires shots at top speed due to its Tensor technology. The Enhanced Traction Surface and unique pimple geometry further maximize spin and control. If you're looking for a rubber that can do it all, the JOOLA MAXXX 450 is it!

2.0/max

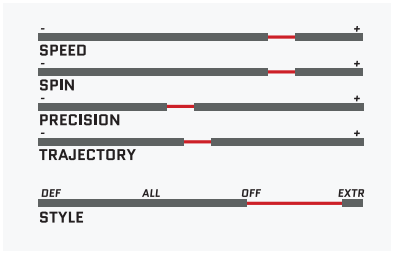

ES TRACTION · MOMENTUM SPONGE

X-PLODE

Named for its explosive power, the JOOLA X-Plode rubber features a hard Momentum sponge that incorporates Tensor technology for speed and elasticity while the Enhanced Traction Surface provides unrivaled rotation. Be prepared to hit your game-winning shots with the torpedo-like speed of the JOOLA X-Plode!

2.0/max

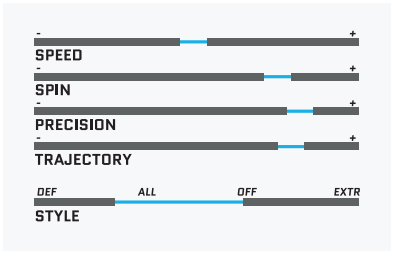

ES TRACTION · MOMENTUM SPONGE

X-PLODE SENSITIVE

Craft an unparalleled spin game with the JOOLA X-Plode Sensitive rubber! The JOOLA X-Plode Sensitive's soft Momentum sponge allows you to utilize its Tensor technology with more control. Combined with Enhanced Traction Surface technology, the JOOLA X-Plode Sensitive creates explosive rotation. Hone your spin technique with the JOOLA X-Plode Sensitive and compete like never before!

2.0/max

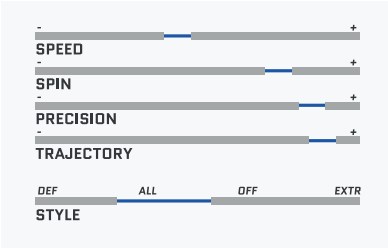

TRACTION BALANCE SPONGE

SAMBA +

Give your spin game a boost with the JOOLA SAMBA Plus rubber! While the soft Balance sponge offers high control values, it gets a boost with JOOLA's Tensor technology to catapult shots with great sound. The JOOLA SAMBA Plus offers the optimum balance of feeling, speed, and precision to up your game.

2.0/max

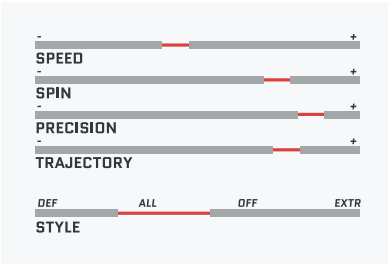

TRACTION BALANCE SPONGE

SAMBA

Achieve a great spin game with the legendary JOOLA SAMBA rubber! The soft Balance sponge utilizes unvulcanized natural rubber to deliver great feeling and control. It's super elastic characteristics are ideal for players looking to perfect their topspin shots. Unlock your potential with the JOOLA SAMBA!

1,8/2,0/max

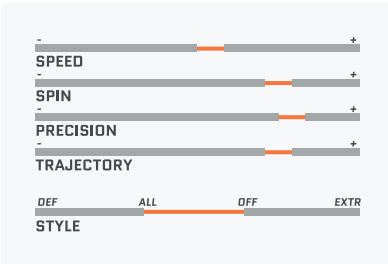

TRACTION BALANCE SPONGE

ENERGY

Add speed to your game without sacrificing control! The JOOLA ENERGY rubber combines a fine-pored Balance sponge with Tensor technology to bring you the ultimate balance of control and power. The JOOLA Energy rubber brings together spin, speed, and precision to take your game to the next level!

2.0/max

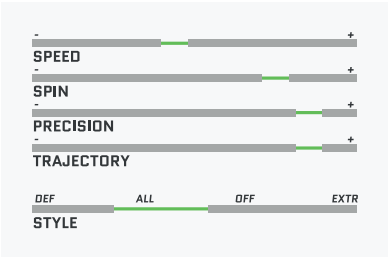

TRACTION BALANCE SPONGE

ENERGY X-TRA

Perfect your technique with the JOOLA ENERGY X-Tra rubber! The soft Balance sponge offers high-levels of control for precise attacks while the Tensor technology brings added power. With the JOOLA ENERGY X-Tra, you'll be able to craft a topspin game with great precision!

1,8/2,0/max

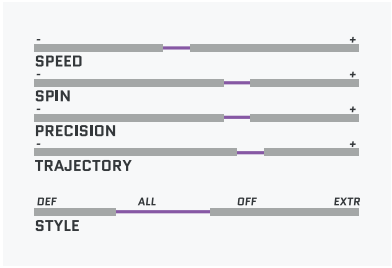

TRACTION MOMENTUM SPONGE

ZACK

Get the most out of your game with the JOOLA ZACK rubber! Made in Germany, the JOOLA Zack with medium-soft Momentum sponge is well-suited for allrounders who prefer good control, precision, and rotation without the high catapult effects or extreme speed. The JOOLA Zack is the rubber of choice for perfecting your technique.

1,9/max

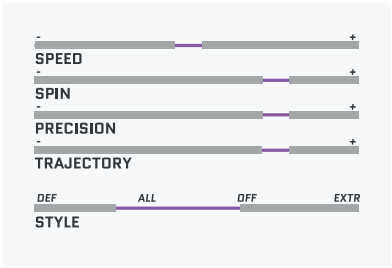

TRACTION BALANCE SPONGE

MAMBO H

Add speed and spin to your game without sacrificing control! The JOOLA MAMBO H rubber offers speed and control with its medium-soft Balance sponge. Combined with the grippy topsheet, this rubber creates unparalleled energy for dynamic play. Liven up your game with the JOOLA MAMBO H!

1,8/2,0/max

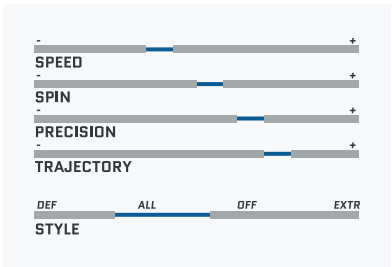

TRACTION BALANCE SPONGE

AXXESS

Give your game a running start with the JOOLA AXXESS rubber! Designed for ambitious allrounders, the soft Balance sponge provides excellent ball feedback and control capability. The grippy topsheet also allows players to add spin to their game. Hone your technique with the JOOLA Axxess and play like never before!

1,6-1,8/1,9-2,1

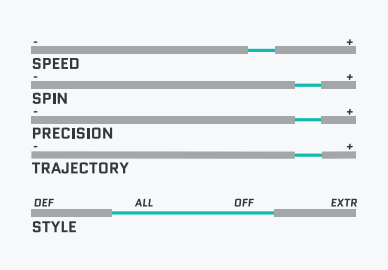

BALANCE SPONGE

TANGO ULTRA

The JOOLA TANGO ULTRA was developed with the short-pip blocker in mind. This rubber features a soft Balance sponge that uses Tensor technology to absorb the ball's momentum during passive blocking, while providing explosive energy for active blocking and attacks. Keep your opponents on their toes with the JOOLA TANGO ULTRA!

2,0/max

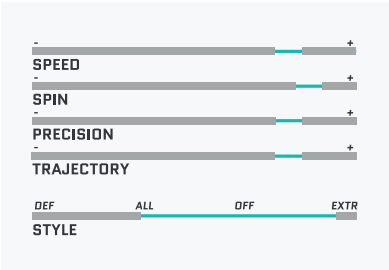

BALANCE SPONGE

EXPRESS ULTRA

Designed with short-pip hitters in mind, the JOOLA EXPRESS ULTRA features a soft Balance sponge that incorporates Tensor Technology, creating additional speed and spin values. Craft an unparalleled counter hitting game with the JOOLA EXPRESS ULTRA!

2,0/max

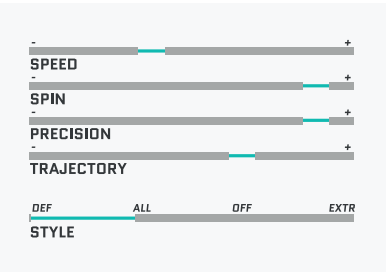

BALANCE SPONGE

CWX

Equip yourself with the rubber of legendary defender Chen Wei Xing! The JOOLA CWX features a hard Momentum sponge integrated with Tensor technology to create ideal conditions for backspin strokes. Meanwhile, the unique pimple structure allows for extreme chop defence with maximum control. The JOOLA CWX suits all aspects of modern defensive play!

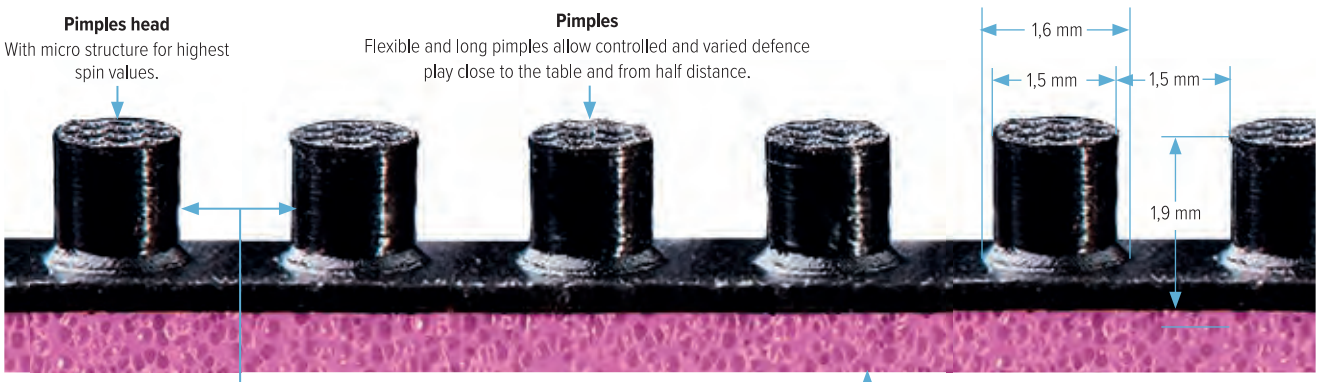

0X/0,5/0,9

CWX IN CHECK

Pimples head
With micro structure for highest spin values.

Pimples
Flexible and long pimples allow controlled and varied defence play close to the table and from half distance.

Pimple distance
Maximum large space between the pimples, for a soft touch when hitting the ball.

Sponge
Fine-pored, pink coloured 50° Tensor sponge for a dynamic and powerful game.

BLADES

JOOLA BLADES

Employing over 60 years of research and development, JOOLA's table tennis blades are a culmination of innovative technologies and exciting, high-quality veneer combinations. With 30 blades to choose from, every player can find a blade to suit their playing style. All blades are purposefully designed and precisely manufactured.

PREMIUM

JOOLA **Premium Line** blades are created using premium materials and with an absolute attention to craftsmanship. Our innovative composite materials are sourced from Japan. Handles, the most important connection to the blade, are imported from Italy. Final assembly is completed in South Korea with impeccable attention to detail. We employ high-tech manufacturing techniques such as computer-controlled routing, proprietary sanding methods, and unprecedented quality control. What you get when you use one of our JOOLA Premium Line blades will thoroughly impress you!

PROFESSIONAL

JOOLA **Professional Line** blades utilize innovative technologies, high-quality materials, and first-rate craftsmanship to create blades that will truly propel your game to the next level.

PERFORMANCE

JOOLA **Performance Line** blades are tried and true classics with proven playing characteristics that suit the needs of modern table tennis.

PROGRESSIVE

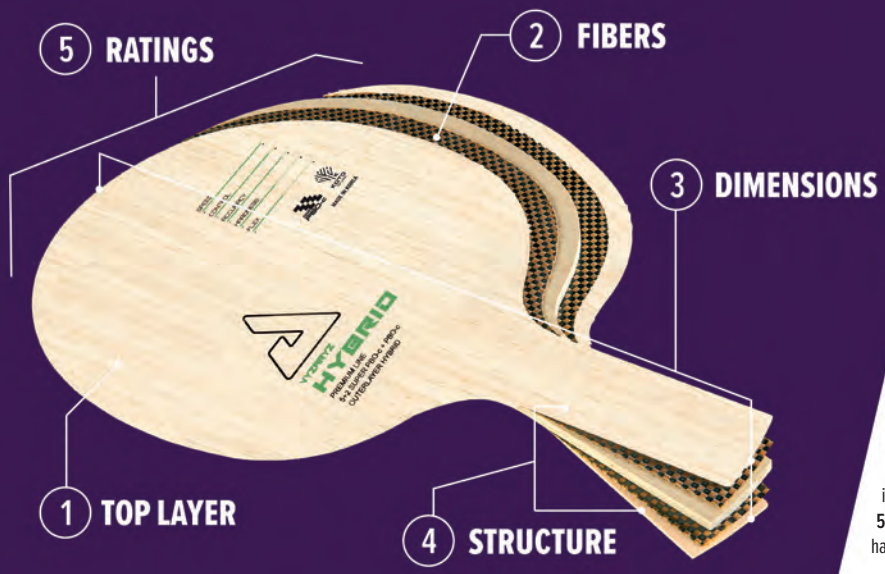

JOOLA **Progressive Line** blades are a great starting point for entry-level players who are ready to get serious about their game. These blades utilize straightforward technologies to create accessible playability.

PRECISION

JOOLA **Precision Line** blades are specifically designed for modern defensive specialists. These high-quality blades utilize unique veneer combinations to craft an unparalleled defensive game.

WHAT IS YOUR JOOLA BLADE?

JOOLA offers a wide range of different blades to meet every player's needs. When trying to determine which blade is right for you, consider these 5 things:

1. **Outer Veneer** - The type of wood use as the blade's outer veneer plays a major part in determining touch and feeling
2. **Composite Fiber** - Whether any and which composite fibers were used will have an impact on the speed, control, and feeling
3. **Dimensions & Weight** - The size of the head, handle, and thickness, as well as the overall weight will affect how you perform with the blade
4. **Component Structure** - Whether the composite fiber is used as an outer layer or as an inner layer will impact how pronounced its characteristics are
5. **Ratings - JOOLA** has created a blade rating system, which covers speed, control, accuracy, hardness, and flex to give you a better idea of how the blade will perform

1 TOP LAYER

KOTO TOP LAYER

A koto top layer provides a firmer and crisper feel on your shots, which is perfect for direct and powerful play.

LIMBA TOP LAYER

A limba top layer provides a soft feel with a higher trajectory on your shots. Perfect for topspin play.

HINOKI TOP LAYER

Hinoki's softer feel gives a one-of-a-kind touch that increases dwell-time for spin and control. All while also giving a catapult effect on the bounce.

2 FIBRES

SUPER PBO-c

A special, tighter weave of PBO fiber and carbon gives Super PBO-c blades a unique, improved blend of speed and feel. The sweet-spot has been further enlarged and produces a homogeneous power output with a medium-hard touch.

PBO-c

The PBO characteristics, extremely tear-resistant and elastic at the same time, predestine this high-tech fibre for the highest demands in table tennis.
A sensitive touch and an outstanding spin dynamic are the characteristics of PBO-c blades.

KL-c

The Kevlar fiber used softens the rather hard touch of the carbon a little bit and thus allows a sensitive topspin play with a medium-hard stroke. This balanced ratio of speed, spin and feel has made KL-Carbon an extremely popular synthetic fibre fabric in the table tennis world for years.

3K-c

Pure dynamics characterises blades with 3K carbon. The carbo strands, which are composed of 3000 filaments (3K), minimize vibration and thus provide enormous stability to the hand. 3K Carbon plays fast, with a flat trajectory and a direct, hard stroke.

AL-c

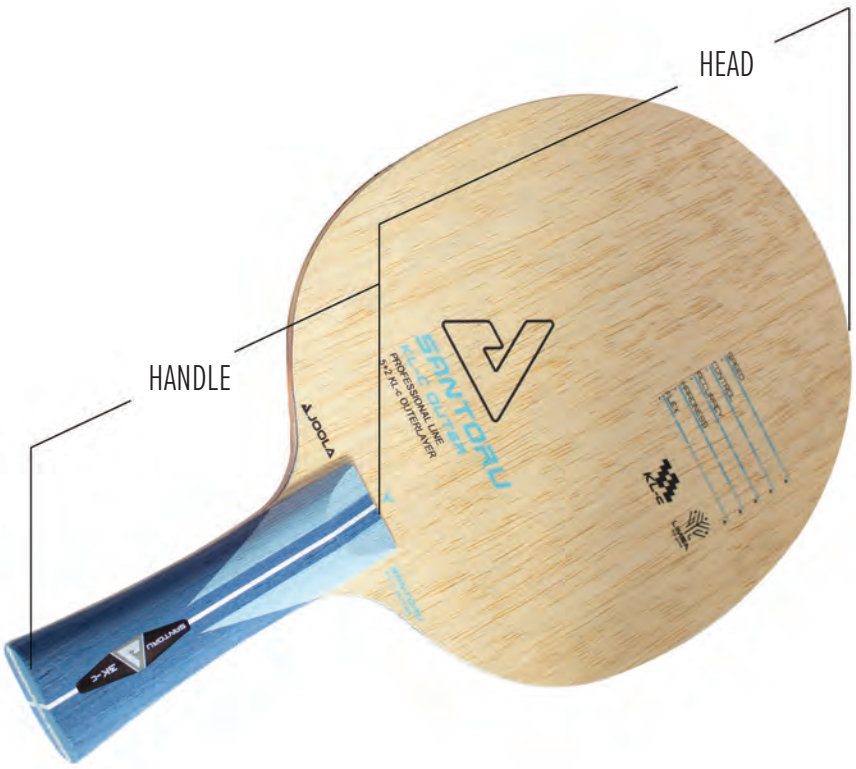

The characteristic dynamic and direct feel is what distinguishes the AL-c synthetic fibre. AL-c, known and loved for its sweet spot, provides stability and thus brings a high degree of precision to your game in addition to exceptional speed values.

The newly developed Cold cure Technology, in which the blade is pressed under lower temperature for a longer period of time, provides a higher trajectory and a softer touch at unchanged high speed - a completely new AL-c experience.

X3

X3 combines the advantages of the premium fibres PBO-c and AL-c and thus sets new standards in synthetic fibre technology. The AL-c fibres, which run vertically up to the handle, stabilize especially in the area where you hold the blade and also provide impressive dynamics. The PBO-c is arranged horizontally and gives X3 blades the feeling that make their playing characteristics unique.

4 STRUCTURE

INNER LAYER

The synthetic fiber are located on the core veneer. This provides a softer touch and more controlat still present stiffness.

OUTER LAYER

The synthetic Fiber is located directly under the top layer and provides a more direct touch at a flat trajectory and high speed.

5 RATINGS

For a comprehensive ratings overview of all our JOOLA blades, please see page 55.

PREMIUM BLADES

JOOLA

JOOLA Premium Line blades are created with premium materials and an absolute attention to craftsmanship. Our innovative composite materials are sourced from Japan. Handles, the most important connection to the blade, are imported from Italy. Final assembly, conducted with the utmost attention to detail, occurs in South Korea. We employ high-tech manufacturing techniques such as computer-controlled routing, proprietary sanding methods, and unprecedented quality control. What you get when you use one of our **JOOLA Premium Line** blades will thoroughly impress you!

FINEST VENEERS

JAPANESE COMPOSITE MATERIALS

NO COMPROMISE

THE BEST FROM ALL OVER THE GLOBE

ASSEMBLED WITH KOREAN PRECISION

ITALIAN IMPORTED HANDLES

VYZARYZ

JOOLA PREMIUM LINE

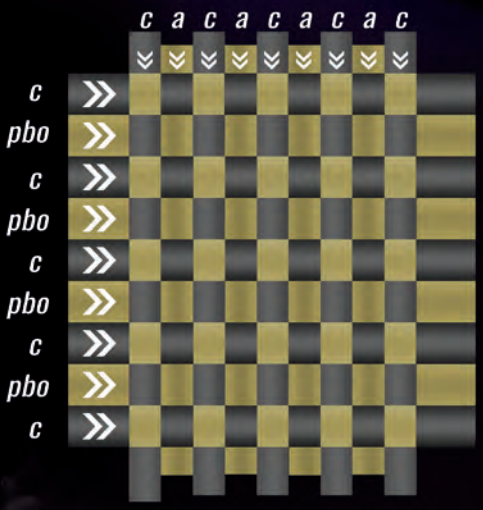

The **JOOLA VYZARYZ** line of blades truly ups the ante for what a table tennis blade can be. We have been able to propel our use of innovative composite materials to new heights by deploying ground-breaking new technologies. Experience Super PBO-C, PBO-C and AL-C like you've never seen before!

INNOVATIONS

1

X3 SUPER COMPOSITE WEAVE

X3

PBO-C creates a larger sweet spot and an incomparable stroke feeling. AL-C adds impressive power. The ground-breaking JOOLA X3 fuses the 2 into a new super-composite directional weave. Horizontal threads of PBO-C create a uniquely consistent playing feel and touch while vertical threads of AL-C extend through the handle to provide stability throughout.

2

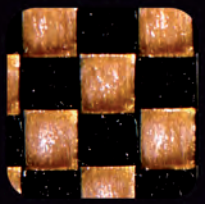

COLD-CURED

AL-C

This is a revolutionary way of maximizing the AL-C experience. This innovative technique involves curing and pressing each individual layer of AL-C over a long period of time and at low temperatures. Compared to a normal AL-C blade, you'll notice this cold-curing technology creates more dwell time and a softer feeling, and produces strong spin shots with a higher arc.

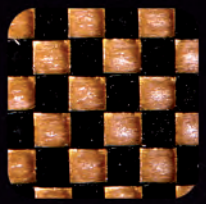

3

PBO-C

HYBRID PBO-C COMBINATION

SUPER PBO-C

Utilizing PBO-C on one side and Super PBO-C on the other, this hybrid technology allows you to account for the differences in forehand and backhand swings and to customize how you play. Whether you want extra speed for your forehand or a higher flight curve for your backhand, you'll be able to play to your strengths and adjust your strategy for an even stronger performance.

DANIEL HABESOHN

When JOOLA came to me with the idea of merging PBO-c and AL-c, I was immediately enthusiastic about the project. Everybody knows the special playing characteristics of blades with PBO-c and AL-c and it seemed very promising to me to bring out the best of both and to compress it in one synthetic fibre. The result blew me away. We tested various specifications and with the VYZARYZ Trinity I quickly realized that this would be my future blade. It is very important for my game that I am very precise in my shots besides a good speed. The VYZARYZ Trinity supports me perfectly on that and further has a very pleasant touch!

NEW

VYZARYZ TRINITY

The JOOLA VYZARYZ Trinity is a complete game changer! In a JOOLA first, this blade contains the revolutionary X3, a state-of-the-art super composite weave. Horizontal layers of PBO-C were woven with vertical layers of Arylate Carbon (AL-C). Imagine the ability to combine power, force, feeling, and accuracy, all in one blade! The outer layer of Limba adds even more touch to every shot. The JOOLA VYZARYZ Trinity blade will give you the X3 super boost when you need it!

FL / ST 5+2 Ply

FL	Width: 34 mm	Length: 100 mm
ST	Width: 28 mm	Length: 100 mm

HEAD

Thickn.: 5,9 mm	Width: 151 mm	Length: 157 mm

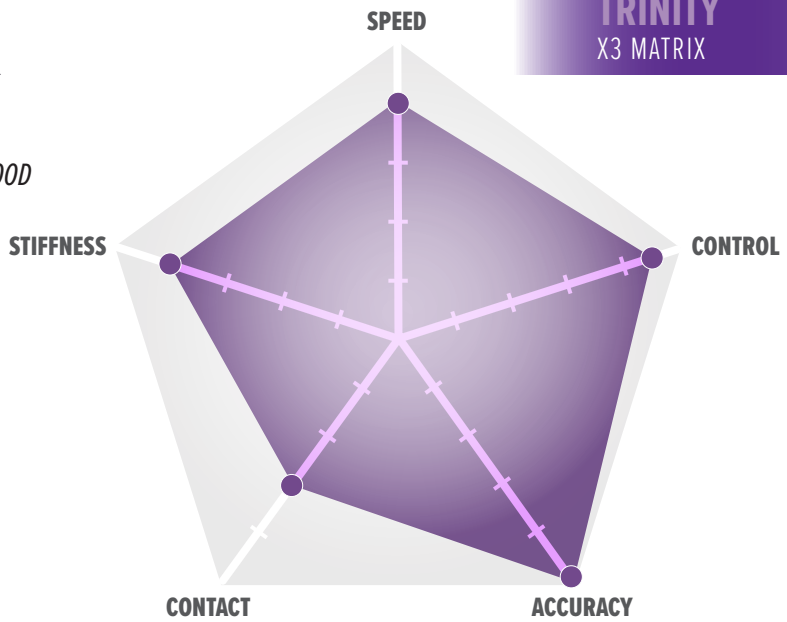

OUTER LAYER

X3

To create the X3, we've combined the 2 most dominating composite fibers into one by weaving horizontal layers of PBO-C with vertical layers of AL-C that extend all the way into the handle. This formula for success truly makes the X3 an unprecedented innovation.

TRINITY X3 MATRIX

VYZARYZ HYBRID

OUTER LAYER

SUPER PBO-c | PBO-c | KOTO TOP LAYER

The JOOLA VYZARYZ Hybrid is the dual-threat blade you've been searching for! It's customized to account for the differences in forehand and backhand swings. PBO-C is used on one side and Super PBO-C on the other. With one, you'll have a lower throw angle, perfect for driving shots. With the other, you'll achieve a higher arc, perfect for traditional spin. Using Koto as the outer veneer, you'll have more dynamic shots and a direct touch. With this 5+2 ply blade, you'll have the ability to choose what is right for your forehand or backhand. Dominate the game with the JOOLA VYZARYZ Hybrid!

HYBRID

SUPER PBO-c

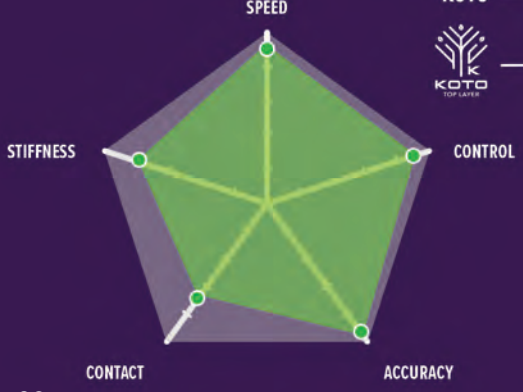

The same composite materials used in PBO-C, but woven in a much higher density. The Super PBO-C significantly expands the sweet spot for an even and explosive ball response.

PBO-c

PBO is a synthetic polymer used in race cars and aeronautics for its durability and high-elasticity. It is used in PBO-C to complement the hard Carbon, creating a larger sweet spot and a softer stroke feeling.

VYZARYZ FREEZE

Quality meets innovation with the 5+2 ply JOOLA VYZARYZ Freeze! The highest-grade AL-C gives this cutting-edge blade a hard and powerful feel, while our innovative and time-consuming low temperature curing technique brings extra feeling and control to the blade. Compared to a normal AL-C blade, you'll notice that the JOOLA VYZARYZ Freeze has more dwell time and produces strong spin shots with a higher arc. An added bonus is the satisfying sound it creates. With a Limba outer-ply, players can rely on the JOOLA VYZARYZ Freeze to provide the ultimate touch for their spin needs. The combination of high-quality AL-C and cutting-edge adhesion techniques brings together a one-of-a-kind blade that has been never seen before!

by keeping the outstanding AL-C power

WHY PLAY VYZARYZ FREEZE

	Helps you to:
+ Feeling	Be controlled, especially in the passive game
+ Increased dwell time	Lead your shots and be precise
+ Higher Arc	Open the game with topspin or backspin and give you the power for spin on spin behind the table
+ Outstanding AL-C Power	Be dominant with hard shots and a lot of spin potential
+ Sound	Love the game!

ENERGON SUPER PBO-c

PBO-c

HIGH TECH FIBERS

Tear resistant and high elasticity are the outstanding features of the PBO fibre. Poly(p-phenylen-2,6-benzobisoxazol (PBO)) is a synthetic Polymer which is also used in formula 1 cars and aeronautics because of its unique characteristics.

In tests it was established that the interweaving of the PBO fibre bundles with the carbon fibres (in chessboard pattern) provide unique playing features for table tennis blades.

On the one hand the blade gains stability through the combination with the PBO-c fabric, and on the other, the elastic PBO fibre and the slightly harder carbon fibre result in a softer stroke feeling. This ideally suits a spin dynamic but controlled offensive play. The enlarged sweet spot also guarantees an even bounce and therefore reduces the error rate.

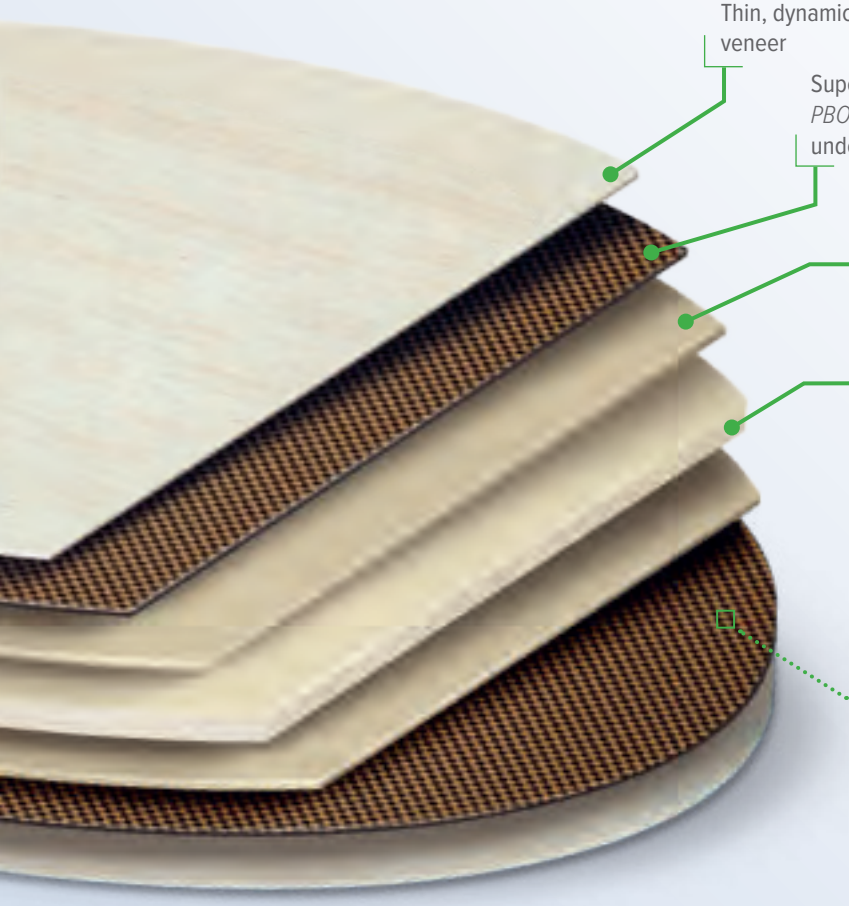

Sweetspot with **PBO-c**

SUPER PBO-c

The popular playing characteristics of the PBO-c blades have prompted the JOOLA development team, supported by the know-how of "World Coach 2017" and JOOLA partner Jörg Rosskopf, to look for ways of improving the playing characteristics of these valuable blades even more. The result of these efforts is the new JOOLA "**Energon Super PBO-c**". Due to a new processing technology, an improved connection between the PBO and the firstly used **1K-carbon fibres** has been reached. As well as the reduction in weight, the optimised interweaving of both synthetic fibres leads to an **enlargement of the sweetspot** (even ball ejection almost up to the edge of the racket) and to maximum ball response with as much explosiveness as possible.

Sweetspot with **Super PBO-c**

Super PBO-c fibers in detailed view

OUTER LAYER

Outer Layer design emphasizes the characteristics of its composite material by utilizing them directly beneath the blade's outer veneers. This direct touch creates a flat trajectory and higher speed.

SUPER PBO-c

The same composite materials used in PBO-C, but woven in a much higher density. The Super PBO-C significantly expands the sweet spot for an even and explosive ball response.

ENERGON

Craft an explosive game with the JOOLA Energon Super PBO-C! Extraordinarily light Super PBO is closely interwoven with 1K Carbon fibers in a criss-cross pattern and lies directly under the thin outer veneers. As a result of this, the sweet spot is enlarged almost right up to the edge of the racket face, providing an even ball response throughout. A medium-hard touch gives this blade great dynamics while the very high playing feeling lets you stay in control. The JOOLA Energon Super PBO-c is astonishingly mistake-forgiving, despite the high speed attributes. Re-energize your offensive game with the JOOLA Energon Super PBO-C!

ROSSI EMOTION
PBO-c

PBO is a synthetic polymer used in race cars and aeronautics for its durability and high-elasticity. It is used in PBO-C to complement the hard Carbon, creating a larger sweet spot and a softer stroke feeling.

Inner Layer design intentionally utilizes the composite material as inner layers on top of the core instead of directly beneath the outer veneer. This maintains the blade's stiffness while providing a softer touch and more control.

PBO-c fibers in detailed view

ROSSKOPF EMOTION PBO-c

Experience a new dimension of play with the JOOLA Rossi Emotion PBO-C! While the original JOOLA Rossi Emotion utilizes a Carbon core, the JOOLA Rossi Emotion PBO-C uses layers of JOOLA PBO-C directly on either side of the core to create a more dynamic blade with increased feeling. Kiri veneers were chosen to create a more balanced blade while high-quality Hinoki outer veneers were utilized for increased control. With maximum energy transfer from the inside and extraordinary controlled touch from the outside, the JOOLA Rossi Emotion PBO-c blade creates an exciting experience!

JÖRG ROSSKOPF...

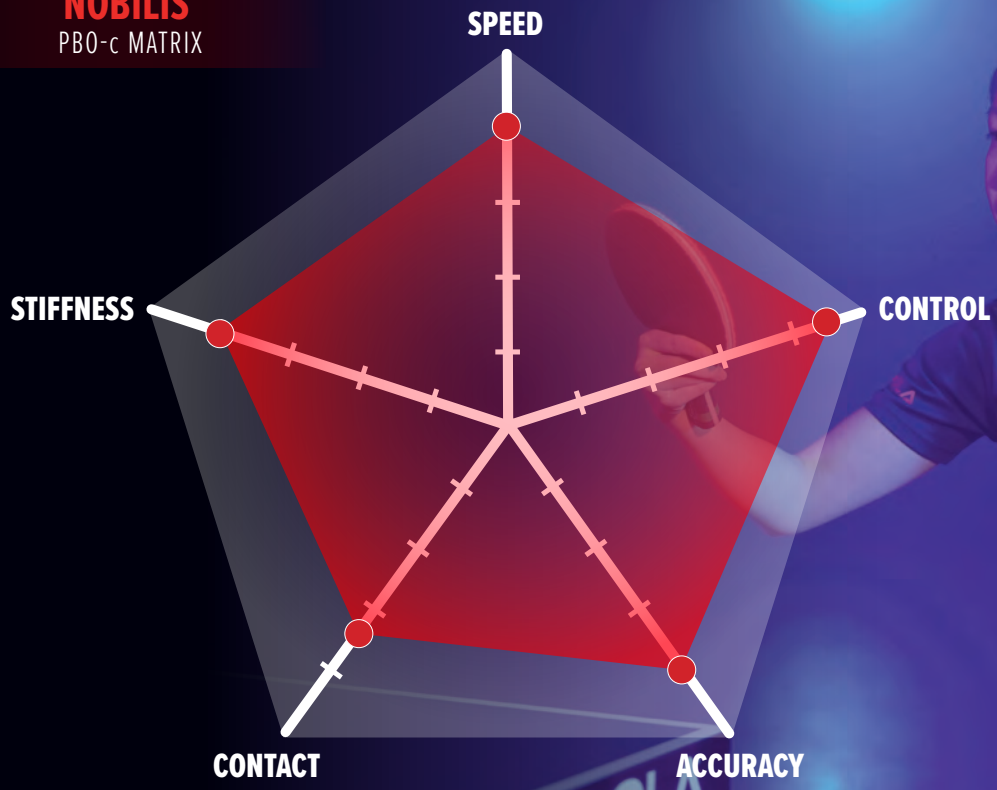

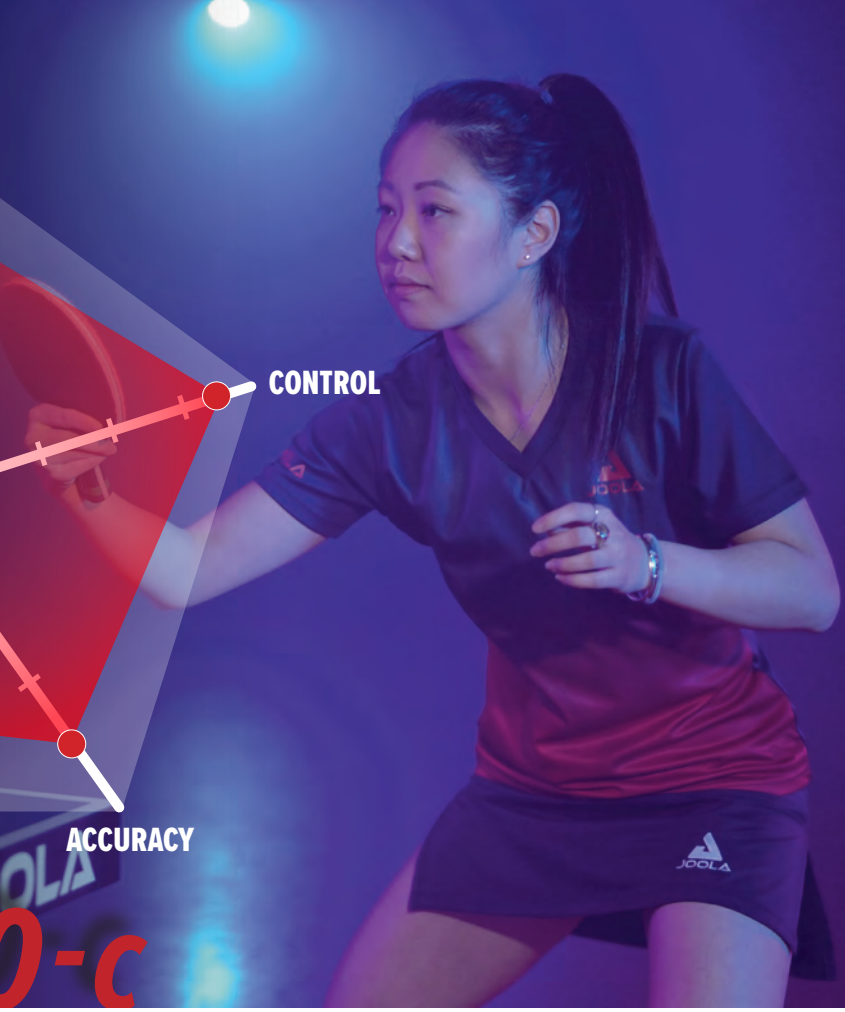

... on the development of blade production in recent years:
In the past you played mostly with the so-called solid wood bats. Specific technologies were less important here. Today, manufacturers are much more meticulous about innovation in terms of development. Blades are not just "play equipment", they are an expression of individuality and can therefore also be seen as a "statement". Especially in terms of technology & design, the expectations of today's TT players have increased immensely.

... on the major innovations in the technology sector:
After developing the blade classic Rossi Emotion, I was involved in the creation of the latest premium blade, the Rossi Emotion PBO-c. Crucial innovation of this blade is the processing of high-quality PBO fibre interwoven with carbon fibres (PBO-c). In some tests we have found that this PBO-c compound leads to a softer touch feeling with maximum dynamics. Many JOOLA players are excited about the new technology. Daniel Habesohn (Energon Super PBO-c) and Petrissa Solja (Nobilis PBO-C) have already achieved great success with their new blades in the recent past.

... on the difference between the classic Emotion and the new Emotion PBO-c:
The aim of the development was to design an offensive blade from the beginning, which is basically based on the popular Rossi Emotion veneer composition. Due to my work as a national coach and the constant exchange with players, I was able to determine early on with the introduction of the plastic ball that the new ball led to a reduction in speed and rotation. So my approach to developing the Rossi Emotion PBO-C was to compensate for this disadvantage. Two main factors are leading the way in this direction: The extremely dynamic PBO-c fibre and the use of thick, very high-quality, soft Kiso Hinoki exterior veneers.

NOBILIS
PBO-c MATRIX

NOBILIS PBO-c

PBO-c fibers
in detailed view

Play like an elite athlete with the JOOLA Nobilis PBO-C! In this blade design, the PBO-C layer is placed directly in-between the Kiri core and the thicker 1.2mm Hinoki outer veneers. This construction gives the blade stability, elasticity and a lot of force, enabling very precise play even at high speed. The high-quality Hinoki outer veneers give the blade prolonged ball contact time and allow for the most extreme spin with high ball trajectories. The JOOLA Nobilis PBO-C will take your offensive game to the next level!

ZeLeBRO

Arm your game with the JOOLA Zelebro PBO-C! This 5+2 ply offensive blade generates explosive and direct power without losing control. The focus of the JOOLA Zelebro are the 2 PBO-C layers positioned directly under the upper Limba veneer. This combination produces an enlarged sweet spot, a lot of repulsion, and a medium-high trajectory. The vibration dampening effect of the PBO-C is ideal for all players that prefer direct offensive play with precise strokes. Play like a champion with the JOOLA Zelebro PBO-C!

JOOLA®

SANTORU

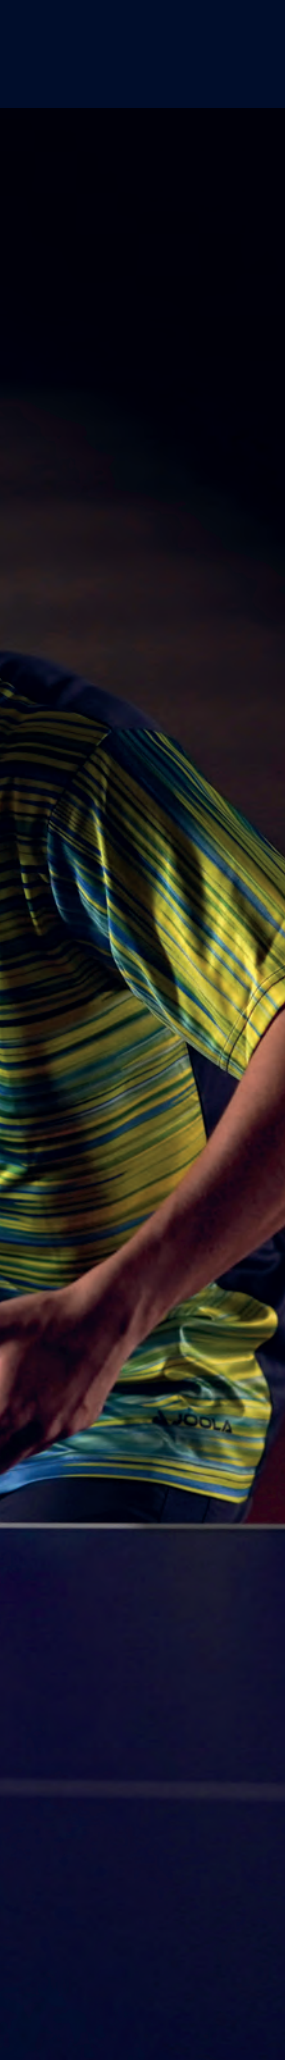

NEW

SANTORU BLADE SERIES

The JOOLA Santoru series was crafted for offensive players looking to maximize their spin and speed potential. Using only high-quality Carbon and Carbon-Kevlar composite materials and specially selected wood veneers, each JOOLA Santoru series blade is impeccably well-balanced. Each of the 3 blades feature very intentional material combinations to emphasize the most advantageous playing characteristics for different offensive styles.

SANTORU 3K-C

Harness the power of the JOOLA Santoru 3k-C for your offensive game! This blade utilizes a solid Kiri core with soft Hinoki outer plies. In between is our 3k-C, a state-of-the-art Carbon fiber weave, which creates an enlarged sweet spot. This hard-hitting blade with direct responsiveness has a lower trajectory and is perfect for those hard-hitting and driving shots.

NEW

XYLO BLADE SERIES

The JOOLA Xylo series brings the unique advantages of an all wood blade to the forefront of competition. The touch felt from an all wood construction creates an experience of being one with the blade. Through the use of superior materials and unique veneer combinations, the JOOLA Xylo series gives players the classic all wood feel of the game, with modern day speed.

XYLO 5

The JOOLA Xylo 5 is an innovative all wood blade designed for the top player! This blade consists of a Kiri core with Ayous inner layers, which provide the perfect amount of control and feedback. A specialized heating technique was used on the Hinoki outer veneers to ensure a higher stiffness for speed and overall balance. If you're looking for control, precision, and an all-natural feel, the JOOLA Xylo 5 is the perfect choice for you!

SOLJA OFF+

This blade, used by the current world ranked no.15 and bronze medal winner at the 2016 Olympic Games with the German women's team, impresses by a perfect combination of speed and playing feel. Since the introduction of the plastic ball, Peti has been looking for a blade that meets her high requirements. A blade that provides a lot of dynamics for her offensive game and also offers maximum feeling and precision in block and counter duels. The balanced playing features of the 7-ply JOOLA P. SOLJA OFF+ are the result of the special veneer combination. High-quality Hinoki outer veneers provide for a sensitive and direct stroke in all playing situations. Carbon fibre directly on the kiri core veneer provides an enlarged sweet spot and the necessary speed development.

CHALLENGER OFF

The JOOLA Challenger Off blade is ideally suited for the spin-oriented attacker. The Limba outer veneers are preferred by topspin players for the feedback it creates. The Ayous veneers are more flexible, creating an elastic effect and medium touch that promotes more spin with a higher ball trajectory. A medium-fast blade, the JOOLA Challenger Off offers great control for precise attacks. It's the perfect choice for progressive players looking to level-up with a higher-quality blade at an attractive price.

CWX DEFENDER

The JOOLA Chen Defender was designed in partnership with legendary defender Chen Weixing. Featuring a straight handle and a slightly larger head, this blade provides exceptional control and accuracy for close-to-the-table counterdrive play. Lightweight and pliable SAMBA veneers are held together with soft-drying Enzo glue, giving the blade more feel. You'll never miss a shot while lobbing or chopping with the JOOLA Chen Defender!

CWX

The JOOLA Chen Weixing is the namesake blade of one of Europe's best defensive players. 2 layers of black-cloth are utilized in the blade construction to provide increased control. With a solid Kiri core and soft Limba outer veneers, the JOOLA Chen Weixing is well-suited for chopping, but is also capable of fast topspin - perfect for all aspects of modern defensive play!

JOOLA
SPO

DRYPLAY

Lightweight, breathable functional fabric made of high-quality polyester fibres, which moisture away from the body to the outside of the tissue, thereby reducing the rapid evaporation of sweat. The result is a dry and performance-optimized body. The functional fibres, which are often strained by the sport, are also extremely robust and convince by a maximum pleasant wearing comfort.

MESHTEX

Synthetic fibre netting consisting of small woven mesh characterized by high breathability due to the incorporation of microspots for air regulation. The JOOLA mesh fibres are also extremely flexible, lightweight, moisture-regulating and there fore ideally tailored to the needs of table tennis.

SUBLIMATION

Textile printing process in which a special dye (sublimation ink) is transferred into the carrier by pressure and heat. The sublimation ink penetrates completely into the material, disturbing seams can be dispensed with. The material remains very light, the color is very detailed and above all stable.

ELASTOFIT

Due to the fibre composition, JOOLA competition textiles offer an excellent wearing comfort. The flexible stretch part ensures optimal seat and ensures optimum freedom of movement with table tennis-specific movements.

COTTON

Cotton textiles from JOOLA convince by a pleasant wearing comfort and highest quality. They are light, extremely flexible and ideal for table tennis specific movements. The cotton fibres used also ensure sufficient cooling of the body, which is very important especially under high strain.

VISION ROLLBAG

The JOOLA Vision Rollbag is an extra-large duffle with wheels. The large oversized storage area allows you to easily organize all your clothing and table tennis gear. The adjustable 2-stage built-in handle and the smooth-roll wheels make moving the bag effortless. The steel-reinforced Rollbag maintains a firm vertical standing position when well-packed. There's even a built-in exterior name tag holder with clear window for easy bag identification!

Material: 600d Polyester - 210d Polyester
Dimensions: 73 x 40 x 35 cm

black/red

VISION COACH BACKPACK

The JOOLA Vision Coach Backpack has everything a table tennis coach could need! The main compartment features a padded laptop sleeve that can be secured with a hook-and-loop fastener, an interior zip pocket, and a pocket fit for a phone. A co-molded rubber and fabric handle on the side of the bag allows users to carry the backpack briefcase-style. The padded shoulder-straps can be tucked away when not worn as a backpack. Coach in style with the JOOLA Vision Coach Backpack!

Material: 600d Polyester - 210d Polyester
Dimensions: 31 x 10 x 41,5 cm

black/red

VISION SHOE BAG

Keep your training bag clean and organized with the JOOLA Vision Shoe Bag! Use the stylish drawstring bag to keep dirty shoes and sweaty clothes separate from the rest of your table tennis items. The black material with two-tone graphic looks great and is machine washable.

Material: 600d Polyester - 210d Polyester
Dimensions: 39 x 33 cm

black/red

VISION DOUBLE RACKET CASE

The JOOLA Vision Double Racket Case is unlike anything else on the market! The clever curved design with posterior strap gives you a secure grip on the case, opened or closed, using one hand. Inside, there's storage for 2 rackets separated by a padded divider and a mesh pocket for 4 balls. The front exterior features a mesh pocket with elastic opening to provide additional storage for personal items like a phone and keys. Carry all your essentials with ease using the JOOLA Vision Double Racket Case!

Material: 600d Polyester - 210d Polyester
Dimensions: 18 x 5.1 x 31 cm

black/red

VISION SAFE RACKET CASE

The JOOLA Vision Safe Table Tennis Racket Case with 2 storage compartments is ideal for the serious player. Featuring custom-molded SBS zippers, one section unzips to reveal 2 unique pockets that hold 1 racket each. The other section is ideal for storing small personal items. Encased foam padding provides an extra protective layer. The JOOLA Vision Safe Racket Case is an all-in-one for protecting your items!

Material: 600d Polyester - 210d Polyester
Dimensions: 30 x 21 x 6.5 cm

black/red

VISION FOCUS CASE

The JOOLA Vision Focus Racket Case is the perfect mid-size protective case. With custom-molded SBS zippers, the case unzips to reveal a lined interior with space for 1 racket, plus small accessories. Encased foam padding provides an extra protective layer. Keep your equipment safe with the JOOLA Vision Focus Racket Case!

Material: 600d Polyester - 210d Polyester
Dimensions: 30 x 21 x 3.5 cm

black/red

ALPHA BAG

The compact JOOLA Alpha Bag is the perfect companion for all sporting activities. The 2 side compartments are perfect for shoes while the spacious interior is roomy enough for all other belongings. The top flap offers mesh pockets that hold small personal accessories like a phone or keys, as well as pingpong balls. Arrive to practice in style with the JOOLA Alpha Bag!

Material: 600d Polyester + Twill Nylon
Dimensions: 64 x 37 x 30 cm

navy/blue

ALPHA ROLLBAG

The JOOLA Alpha Rollbag is a large duffle bag and features a spacious main compartment, 2 smaller side compartments, and an outer pocket. Keep everything from clothes, shoes, to table tennis equipment organized in its own space! The convenient design gives you the option to either carry it like a duffle or roll it like a suitcase. The JOOLA Alpha Rollbag is your ideal travel companion!

Material: 600d Polyester + Twill Nylon
Dimensions: 80 x 42 x 36 cm

navy/blue

ALPHA BAG LINE

The JOOLA bag line Alpha convinces with an attractive design, optimal division and superior quality of the tearproof polyester material.

Maximum space, various stowage possibilities for rackets, clothing and sports equipment or essential accessories, supplemented with high-quality zippers and wearing elements make the Alpha line the ideal companion for sporting activities or private life.

ALPHA BACKPACK

The JOOLA Alpha Backpack is designed for the day-to-day user. Keep your phone, keys, passport or tournament documents handy in the outer compartment. The main compartment has plenty of room for your table tennis gear while the 2 exterior mesh side pockets are perfect for keeping your water bottle within reach. The JOOLA Alpha Backpack is practical for everyday use!

Material: 600d Polyester - 210d Polyester
Dimensions: 34 x 50 x 23 cm

navy/blue

APLHA TROLLEY

The JOOLA Alpha Trolley Backpack is your perfect all-in-one weekender, tournament bag, and backpack. The lightweight locking telescopic handle make using it as a rolling backpack, a breeze. Unzip and secure the posterior pocket to reveal padded backpack straps for easy wear. Its clever multi-functional design and ample storage makes the JOOLA Alpha Trolley Backpack suitable for all your personal storage needs!

Material: 600d Polyester - 210d Polyester
Dimensions: 31 x 51 x 21 cm

GSC 25

25MM SURFACE • UNIQUE EVEN BALL BOUNCE

The JOOLA GSC 25 Table Tennis Table is JOOLA's top-of-the-line ITTF-approved competition table! This centerfold table has an eye-catching gold one-piece undercarriage with a powder-coated 50mm metal frame. The innovative automatic system allows the table to easily glide from playing to storage position. The high-quality playing surface has been coated using an advanced technique to ensure even ball bounce. The JOOLA GSC 25 Table Tennis Table can be easily rolled into place with its 4 heavy-duty wheels, 2 of which lock, and leveled using its 4 adjustable rubber levelers. This table complies with European Norm on tennis tables safety (EN 14468-1 A).

iPONG V300

The JOOLA IPONG V300 offers everything you need to up your game! This robot holds over 100 40mm+ ping pong balls and shoots at an adjustable frequency ranging from 12 to 70 balls per minute. The JOOLA IPONG V300 features a memory button to save your favorite setting as well as a play/pause button to make adjustments. Use the wireless remote to switch between endless shot options ranging from levels 0-9 for: ball frequency, side-to-side oscillation, topspin speed and underspin speed. Place the robot on the included tilt stand to practice an even wider range of strokes. Start playing like a pro in just seconds with minimal assembly!

Dimensions: 48 x 28 x 28 cm

blue

iPONG V200

The JOOLA IPONG V200 is perfect for practicing without a partner! The robot holds up to 100 40mm+ ping pong balls and casts at an adjustable frequency ranging from 12 to 70 balls per minute. Use the remote to switch between backspin, topspin, and heavy topspin. Place the JOOLA IPONG V200 on the included tilt stand to practice an even wider range of strokes. This simple, affordable, and fun table tennis robot brings recreational table tennis to a new level of competitive play.

Dimensions: 48 x 28 x 28 cm

green

iPONG V100

Learn table tennis the right way with the JOOLA IPONG V100 Table Tennis Training Robot! This robot is ideal for beginners and shoots out customizable topspin balls so that you can master your table tennis skills. Just use the wired remote to get your desired spin! There's no more waiting for a practice partner. This compact machine is more like a live opponent rather than a 'playback feature,' and it can continuously shoot more than 100 table tennis balls before needing to be reloaded. The JOOLA IPONG V100 Table Tennis Training Robot comes with a tilt stand so you can practice shots from various angles!

Dimensions: 45 x 28 x 28 cm

red

SERVICE PRACTICE NET

The JOOLA Service Practice Net reliably collects balls during service, multi-ball, or robot practice! It uses a built-in funnel design to collect your spent pingpong balls into a container (not inlcuded), saving you time and allowing you to easily refill your training robot! The JOOLA Service Practice Net has an intelligent rolling system and practical folding mechanism that allow for easy storage. This is a must for clubs and for players serious about their training.

ROBOT SHORTY

The multifunctional JOOLA Shorty Training Robot has variable speeds, 8 different spin modes, different trajectories and multiple oscillation settings, which can all be adjusted with the wired remote to provide customized training. The large ball container, which holds up to 150 balls, and the included collection net make multiball training a breeze! Become a table tennis pro in no time with the JOOLA Shorty Training Robot!

gold/black

COLLECTION NET

The JOOLA Ball Collection Net is the perfect companion for the TT-Buddy. With a sturdy, easy-to-assemble frame and impermeable net, it reliably collects balls during service, multi-ball, or robot practice and saves extra time by directing balls into an awaiting bucket or box (not included) below the net. The JOOLA Table Tennis Ball Collection Net can be directly mounted onto all regulation-sized tables.

STANDARD SCOREBOARD

The JOOLA Standard Scoreboard features a fixed tri-fold design, which can be easily collapsed for storage. The durable weatherproof material makes this a great choice for playing in any setting. The JOOLA Standard Scoreboard has time-out and home/guest displays with scores 0-30.

POINTER SCOREBOARD

The JOOLA Pointer Scoreboard is ideal for club and tournament use! Featuring a spiral spine, the scoreboard easily unfolds and is kept in standing position using the durable storage box as a stand. Time-out cards are included.

RESULT SCOREBOARD

The JOOLA Result Scoreboard is made from a hard, durable plastic - making it the perfect choice for frequent club use. It features sturdy, non-tear PVC number cards that can indicate 0-5 for sets and 0-30 for points. The design of the JOOLA Result Scoreboard acts as a storage case when the scorebard is closed.

UMPIRE TABLE

The JOOLA Table Tennis Umpire Table is the umpire table of choice for many international events and is suitable for club use. It features a clever self-folding design with built-in handle. It can be safely carried and easily stored.

UMPIRE TABLE WITH TOWEL BOXES

The JOOLA Umpire Table with Built-In Towel Boxes is the ultimate choice for tournament use! The umpire table is in the center with towel boxes conveniently located on either side. This one-piece design can be carried by one person and be set up in a few seconds.The solid construction ensures longterm usability.

TOWEL BOX

The JOOLA Standard Scoreboard features a fixed tri-fold design, which can be easily collapsed for storage. The durable weatherproof material makes this a great choice for playing in any setting. The JOOLA Standard Scoreboard has time-out and home/guest displays with scores 0-30.

BARRIER TRANSPORTER

The JOOLA Barrier Transporter is a double-decker storage hanger for table tennis barriers. Featuring 4 lockable wheels and 40/40mm steel tube construction with zinc-coating, 4 sets of hangers can be directly hung on the JOOLA Barrier Transporter. There is a maximum of 14 barriers on each side. This transporter is available in 2 different length options.

2,00m transporter
2,33m transporter

BARRIER

JOOLA Barriers are ideal for daily club use. Made with sturdy, tear-free PVC and measuring 90cm tall, rogue shots will be stopped from entering adjacent courts, so that the flow of play stays undisturbed.
